

International First Aid Team Commended By Dominion Executive

St. John Ambulance Association Team Awarded Medals as Winners Coderre Competition

The following letter from Colonel J. T. Clarke, acting director general, St. John Ambulance Association, Ottawa, to J. M. Rushton, local secretary of the Association, is highly creditable to Harry Parkinson, captain of the team: Ernest Hill, E. K. Hill and Harold Chamberlain.

Dear Mr. Rushton: On behalf of the general executive, St. John Ambulance Association, it is desired to extend to you our sincere congratulations on the showing of your team for the Coderre Miner's Cup your team winning second place for the Dominion, with only nine marks behind the winning team.

Suitable awards are being made under separate cover.

The president of the local Association is R. M. Greenhalgh, and the instructors are Dr. K. F. Borten and Dr. H. McLean. Mr. Rushton intimates that a suitable gathering will be held for the presentation of the medals.

ROD & GUN CLUB COMPETITION RESULTS, AUG. 13

Third competition of the season held at Castle River, first prize, Mr. Ma-thers, heaviest basket speckled trout; second, John Kovach, heaviest mixed basket; third, Matthew Wilson, heaviest speckled trout; fourth, no entry for bull trout; fifth, Henry Chas. Grayling.

The fourth and last competition will be held at the North Fork on Sunday, August 27—D. Holly, secretary.

LOCAL AND GENERAL

Mr. Poole of McBurney's drug store now emulates the old naval hero Lord Nelson. For a considerable time he suffered from one eye which was seriously affected, and recently was operated on in Calgary for its removal. He has benefited greatly in health, and is back on the job again with his usual cheery remarks and friendly smile.

In buying printed matter from the Journal office you help furnish work for men who live here and who pay taxes and spend their money here. By giving orders to those who solicit work for printing offices in other cities, not a cent paid for the work is spent in Coleman, neither do they contribute a cent in taxes to the town. Mutual benefit is derived by buying from the Journal in helping create and develop local industry.

A social was held at the Catholic hall on Thursday evening, Aug. 10, when presentations were made to Penelope McDonald, who is going to Holy Cross hospital as a nurse-in-training; Marie Naylor, who will go to Cranbrook hospital and Linda Dececco, who will go to the Royal Alexandra hospital, Edmonton. A presentation was also made to Rev. Fr. Speckmaier, prior to his leaving to reside in British Columbia.

Rev. Fr. Speckmaier intends leaving on Monday to reside at Okanagan Lake B.C., his last service at Holy Cross church being on Sunday, Aug. 20. Through the Journal he desires to express his appreciation of friendships formed during his year's residence here and states that though unable to make personal farewell calls he trusts his expressions of appreciation will be accepted by his many friends and acquaintances.

FOOTBALL NOTES

Coleman football team again experienced the pain of defeat in their game with Fernie, when they were defeated by a score of 1-0. Fernie scored about nine minutes before the close of play. Coleman's team—McDonald, A. Balloch, Stuart, Joe Kalka, R. Lloyd, J. Park, Loughry, W. Anderson, Ferraro, J. Anderson, L. Ford, Referee, F. Sharp, Coleman.

ANNOUNCEMENT

Mr. Melville Anderson, of Anderson & McLean, sight specialists, Calgary, announces his next visit, to G. R. Powell's, Coleman, on

Tuesday, September 5
20 years' experience and regular visits assure you of satisfaction in all optical work.

DOUBLE HEADER BOXING CARD COLEMAN ARENA, AUG. 26

Jimmy Burrill, lightweight champion of the Crows Nest Pass, is undergoing vigorous training in preparation for his ten-round match here on August 26 against Angus Morrison of Kimberley. Those who saw him in action against Stanmore of Lethbridge on July 23, when he knocked him out in 45 seconds of the first round, are counting on Jimmy retaining his title. Up at Kimberley the Courier states that Angus supporters are looking for him to win. His older brother, Murdo, is matched against Duke Hyslop of Lethbridge, in middle-weight class. At this end of the line Hyslop has good support, but Murdo Morrison's record indicates that there will be no such easy victory for Hyslop as that of July 23 when he floored Russell, McGillivray triple champion, in the first round. It is reported that W. C. Stone, an enthusiastic fight fan of Corbin, will be the announcer. Bill Burrows can be relied on to referee the bouts in his usual calm and dignified manner. So uncertain is the outcome that up to the present nothing has been reported of anyone being anxious to wager any sidebets except at even money. With a program of two main bouts and three good preliminary events, it is the best boxing program staged this season.

COLEMAN HOMING SOCIETY

Results of race from Taber to Coleman, air-line distance 106 miles. Birds liberated 7.29 a.m., arrived 10.33 a.m.: J. Anderson 1029.5 yds per min
W. Roughead 1028.5 " "
W. Pryde 1022.7 " "
T. Jackson 1022.4 " "
W. Harrison 1021.3 " "
C. Makin 1020.4 " "
First prize, window sash donated by J. S. D'Appollonia; second prize, tie, donated by Charles Nicholas.
Coleman Homing Society has had a very successful season and has developed a high standard of birds during the three or four years of its existence. The originator of the sport here was J. Anderson, who brought some pigeons from Scotland, and who has benefited greatly in health, and is back on the job again with his usual cheery remarks and friendly smile.

MISCELLANEOUS

Improvements being made at Sentinel Motors facilitate service to customers. A part of the front of the building is being remodelled and a covered driveway built and pumps installed conveniently so that customers just drive in, order so many gallons and drive on with little delay. More work of a similar nature will provide more work for unemployed, which Mayor Fattinson urges as a measure to help married men unable to obtain regular employment.

A fish was hooked which, before giving up the fight, towed a boat containing a man, a small boy and a cargo of herring through the water for two hours at an average speed of 11 miles per hour. This fish did not get away, but was on exhibition in a wholesale fish dealer's, Montreal. It was a 450-lb tuna fish and was landed after a two hour fight off Lockport, Nova Scotia. Now for some fish stories from anglers of the Crows Nest Pass.

IN MEMORIAM

In Loving Memory of our dear Mother, Mrs. Kroesing, who passed away on August 18, 1932.

We have not forgotten thee, Mother dear,
Even though friends may think we have.

Because, at times they see us smile,
But they little know the heartache,
Our smiles hide all the while.

Inserted by her daughters, Mrs. V. Cyr, Coleman, and Mrs. W. G. Scott, Coaldale, and sons, Ernest and John.

IN MEMORIAM

In Loving Memory of Maria Elisabeth Kroesing, who passed away Aug. 15, 1932.
"No one knows how much we miss you,
No one knows the bitter pain
We have suffered since we lost you,
Life has never been the same.

In our hearts your memory lingers,
Sweetly tender, fond and true;
There is not a day, dear mother,
That we do not think of you."
—Inserted by Mr. and Mrs. A. Hammer and family.

Coleman Radio Flashes Heard by Operator in Wellington, New Zealand

Amateur Operator With Small Set Is Heard Around the World—Receives Acknowledgement

Radio waves travel around the world with very little power when conditions are right, as Adam S. McLintock discovered when he received a card from O. J. Stephens, 43 Cornwell St., Wellington, New Zealand, advising him his signals had been received. Messages from a land where the season is summer to a land where winter now reigns, a distance of over 3,000 miles by direct air line, indicates how far the world has progressed in penetrating the mysteries of the air in the last 20 years. Coleman time when the signals were sent out was 11.30 p.m., July 21; New Zealand time of message received was 5 p.m. on July 22.

LOCAL AND GENERAL

J. O. C. McDonald returned from Edmonton on Sunday evening.

Mr. and Mrs. Luke Lindoe motored to Edmonton to spend the week-end.

Idris Hayson spent the week at Pincher Creek, the guest of his sister, Mrs. J. Morgan.

Mr. and Mrs. R. M. Greenhalgh and Freddie left by auto on Saturday for two weeks holidays at Vancouver.

Buy a Remington Portable Typewriter through the Journal office. Monthly payments may be arranged.

Mr. and Mrs. J. M. Allan are taking a holiday visiting various places in Alberta, including the famous summer resort at Banff.

Ellawynne Narraway returned to Edmonton on Friday last, after spending six weeks the guest of Nora McLeod.

Mr. and Mrs. J. Thomson of Corbin spent Sunday at the home of Mrs. A. E. Price, Mr. and Mrs. George LeRoy coming with them from Michel.

Bob Pattinson, Reggie Jones, Vic Lily, Jack Williamson and Sonny Richards spent Sunday at Waterton Lakes.

Mrs. W. Bell and Margaret spent last week visiting friends in Calgary. Mrs. Bell returned Sunday, Margaret remaining for a few days.

Eleanor Neilson returns today to resume her duty as nurse-in-training at Edmonton.

Mr. and Mrs. J. Kinneir of Calgary and children are spending a holiday here and are occupying part of the time at Crows Nest Lake.

Misses Margaret and Myrtle Dougal have left to spend two weeks vacation at Coleman where they will be the guests of Mrs. Duffield—Lethbridge Herald.

A new G.M.C. truck purchased through Sentinel Motors has been placed in commission by McGillivray Coal Co., Lou Clary bringing it down from Calgary.

During the hot spell golfing has been in the doldrums, but a revival of interest is expected with the approach of cooler weather and September should see some good play.

Mr. and Mrs. Jack Richards returned on Sunday night from two weeks holidays at Vancouver. D. Randall and Ted Flowers accompanied them. Miss Edith Hayson, who had been spending several weeks in Vancouver, also accompanied them to Coleman.

Crows Nest River has a more plentiful supply of fish than for many years. The reason given by anglers is that the removal of the dam at the lake has permitted fish to come down more freely into the river.

Extensive improvements are being made to plant equipment at McGillivray Coal Co. whereby it will rely entirely on its own source of power production for its extensive mine workings and it is reported will allow a large surplus of power.

Store-keepers who may have overlooked ordering advertising calendars for 1933 may have orders filled through The Journal office, which has a range of fine samples available.

YOUR ADVERTISEMENT appearing in the Journal means something of value to your business. It shows that you are alive to the value of a properly printed local newspaper, which is an asset to the community. Large national advertisers of known products as well as progressive retailers use the local newspaper columns because they know it pays and adds prestige to their business.

Personal and Local

Myfanwy Griffiths returned to town after spending a few months with friends at Arrow Lakes, B.C.

Tommy Blower has again joined the Arcadians orchestra after being away a few months visiting friends in British Columbia.

Over 700 attended the football game at Fernie on Sunday when Coleman football team played there in a Crow league match.

Mr. and Mrs. S. B. Ryan are spending two weeks holidays on a motor trip to various points in Alberta and British Columbia.

Miss Edna Fairhurst returned from several days holidays in Calgary, and was accompanied on her return by Arthur Kirkby, who will remain here for a few days.

Frank Barringham, taxi driver, made a fast trip to Radium Springs, covering the 191 miles in six hours. He took up a man and his wife from Coleman who are staying there for a month. Mrs. Barringham accompanied him on the trip.

Water connection with the town system has proved a boon to Catholic cemetery, and has enabled people having graves there to keep their little garden plots fresh and attractive. Many are wishing that a similar service be provided for the Union cemetery.

G. R. Powell's sale of Community Plate was so well responded to that the advertisement was sufficient to sell the special stock indicated in last week's Journal. "Could have sold a lot more," he stated and "it went far more quickly than I anticipated."

Isobel Atkinson and Mrs. Jim Atkinson are holidaying at McMillan Lake. Visitors at the lake on Sunday included Mr. Ed. Ledie, part of whose family are still there; Joe Spieck, who spent a few days there; and "Brick" Bell, who returned on Sunday evening.

Rev. Roy Taylor Enjoyed Stay in Vancouver

Rev. Roy C. and Mrs. Taylor and family returned from Vancouver last week, after spending a pleasant month's holiday there, where Mr. Taylor was acting as supply for one of the city churches. They met several former Colemans there, to whom Mr. Taylor made reference during the service at St. Paul's church on Sunday morning. He thanked Mr. Fairhurst, Mr. Holmes, Mrs. Shevels and others who had continued the services here during his absence, and expressed his appreciation of their faithful service. Now that his holiday was over, he felt prepared to resume his work here with renewed energy, and stated it was the most enjoyable holiday he had spent for years, being delighted with the few weeks he had spent on the Pacific coast and the attractions of the province of British Columbia.

Newspaper Editors to Meet in Vancouver in September

The annual convention of the Canadian Weekly Newspapers Association is to be held at the Vancouver Hotel on Sept. 6-7-8. The editor who will travel the longest distance is A. L. Barrett, of Curling, Newfoundland, who has not missed a convention for many years. His brother at one time was editor of the Coleman Journal, in Partnership with E. F. Gare, who sold out in June 1927. Mr. Barrett is one of the shortest in stature of Canadian editors, but Editor Barrett of Blairmore is the tallest. He also comes from Newfoundland and is the pioneer editor of the Crows Nest Pass towns.

Charles Nicholas is in Edmonton making arrangements for the purchase of winter goods for his store.

Dr. A. E. Shore, of Drs. Gunn, Mackenzie & Shore, Calgary, will be at the office of Dr. R. F. Stewart, Blairmore.

Friday Afternoon, August 18
Anyone wishing to consult him with regard to eye, ear, nose or throat or to be fitted with glasses, please make appointment with Dr. Stewart.

500 sheets White Bond Typewriter Paper, size 8 1/2 x 11, in cardboard box, for \$1.20 at The Journal office. Useful for manuscript purposes or for sending personal letters.

ANNOUNCEMENT

Lessons Of The World Grain Show.

The great World Grain Exhibition and Conference has become a matter of history, but to the thousands of visitors who were privileged to view its wonderful display it will long be remembered as one of their most delightful and instructive experiences. Western Canadians, in particular, who had never had the opportunity of visiting the other provinces of their own Dominion must have been deeply impressed with the variety, magnitude and richness of the resources of their country, and to have obtained through the various provincial exhibits a renewed confidence in the future of Canada.

A tour of the British Columbia exhibit could not fail to be an impressive one with the amazing wealth of resources in that great province. Divided into three sections, the exhibit depicted first the forest and mineral wealth of the Pacific Coast province; then the magnificent fruit products, with their attractive orchard scenes, and finally the fisheries whose products are known and in demand the world over.

Or, jumping over the prairie provinces and into Ontario, the visitor found, not an amazing display of manufactured products from that great industrial province, but a more revealing revelation. Holding the view, as produced from the mines of the province as indicated by the thousands of dollars' worth of minerals on display. They learned how Ontario was proceeding with a vigorous reforestation policy to maintain its forest wealth, how forest fires are fought, and other steps taken to conserve this great natural resource.

Studying the Quebec exhibit, depicting the quiet pastoral life of the people away from the industrial centres, one could not fail to get a new understanding of the ancient province, and to realize what a steady influence it is bound to exert upon the national life of the Dominion. The teeming commerce on the mighty St. Lawrence, its great maritime ports, with the most intensively cultivated farms stretching back from the river banks, all conveyed a picture of beauty, strength and progress, the homes of contented thrifty people.

To visitors from other provinces and countries, the exhibits of the prairie provinces must have been a revelation indeed. Holding the view, as undoubtedly many such visitors did, that these provinces produce nothing but grain and other agricultural products, they certainly had their ideas expanded. Manitoba devoted its exhibit to a display of the wild bird and animal life of that province, extending from its southern prairie fields to the arctic circle. It was one of the show exhibits of the Exhibition and people stood before it in interested crowds lost in admiration.

Alberta demonstrated that it could grow wheat by carrying off the world's wheat championship, but it also let visitors know that 14 per cent. of all the coal supplies in the world were located within its borders, that it produces tens of millions of pounds of beet sugar annually, that its lakes and rivers teem with fish, that its timber areas are very large.

And Saskatchewan, popularly known as the "bread basket of the Empire," which in normal years produces more than one-half of all the wheat grown in Canada, and more than any other single province or state in the world, surprised everybody with its wonderful exhibit of huge logs from its timbered regions, its many varieties of fish, and big fish at that which would do credit to a province by the sea, its mineral wealth of coal and clays in the south and richer metals in the north, its wild bird and animal life, its scenic beauty spots.

The usually accepted picture of the prairies as flat, uninteresting fields of grain, and nothing else, was dispelled by these truly wonderful exhibits. Even to the people living on these prairies they were a revelation. And to unite the whole were the comprehensive exhibits of the Dominion Government revealing in all their richness and variety the magnitude of the resources and products of Canada.

But why recall these things now the Exhibition is over? Because one of the objects of the Exhibition was to bring this knowledge in its most interesting and fascinating and compelling form to the people of Canada and the world. Seeing is believing, and those who saw Canada on parade at Regina cannot fail to have been impressed and convinced of the development and prosperity which the future has in store for this Dominion, and for every part of it.

And such conviction was reinforced by the peeps into the past which was also afforded. One had only to stick their head through in its most interesting and fascinating and compelling form to the people of Canada and the world. Seeing is believing, and those who saw Canada on parade at Regina cannot fail to have been impressed and convinced of the development and prosperity which the future has in store for this Dominion, and for every part of it.

Thus in the midst of a depression which has to some extent at least shaken the confidence of many of our people, the World Grain Exhibition came with its wonderful and beautiful story. It also brought a message. It is not a message of despair, but of hope. A message that, trying and difficult as times may temporarily be, they are, after all, only temporary because a nation with such resources, with such culture, with such virtue and progressive people, cannot fail to surmount any and all difficulties. Canada is for the moment caught in the maelstrom of world events and conditions beyond our control, but it will win through and rise to greater, grander heights than ever before.

Gum boots formed an important item of Canadian export to New Zealand during the first three months of the current year.

The word "tax," we are told, comes from the Latin "taxare," meaning "to touch sharply." No further wisecrack is needed.

The world is too small for the man who knows it all.

Bowel Complaints of Children During the Summer Months

Mothers should look well after their children during the hot summer months. Despite all they can do the children may be seized, at any time, with diarrhoea, dysentery, summer complaint, or other forms of bowel trouble.

There is a safe remedy in Dr. Fowler's Extract of Wild Strawberry, a remedy that has received the endorsement of leading medical authorities of Canada for over 88 years it has been on the market. Don't experiment. Get "Dr. Fowler's" and be on the safe side.

Judge Fines Himself

Makes Penalty Light Because It Was His Birthday.

Under the Chicago system, judges take turns sitting in the various courts, and a recent Monday was Judge Eugene J. Holland's first experience in the traffic division.

Immediately after 10 o'clock took charge, the clerk announced the first case as follows:

"City of Chicago vs. Eugene J. Holland."

Judge Holland sat up very straight and very suddenly.

"What's this?" he asked of the clerk, thinking perhaps that a joke was being played to initiate him into his new environment.

The clerk explained that the case involved a parking charge which was several days old. Holland then recalled that he actually had received a ticket.

"Well," he said, smiling, "this is my first day in traffic courts. It is also my first case here. This also happens to be my birthday. So I'm going to give myself a break. I therefore fine myself \$1 and \$1 costs."

Take Tremendous Chances

Aviators Flying Home Without Rest Are Under Great Strain

Captain James Morrison and his wife, Amy Johnson, both of them crack fliers, left Pendine, Wales, with the intention of flying non-stop to New York. Their plane was brought down at Bridgeport, Conn., not far distant from the objective, but the thing cracked and Morrison and his wife were somewhat injured.

In speaking of the accident, Morrison said "I was so tired I didn't know where I was headed. He had been in the air 29 hours."

Wiley Post, who finished the globe circling trip, said: "I went to bed at least twenty times between Edmonton and New York," that being a hop of 2,200 miles.

There is probably no law which says that people who go on long flights must stop now and then and take a sleep. Truck traffic has some such regulation, but not so with the fliers. Flying for 29 hours is a greater strain than the human mind and body can stand. The Molsons would have been well advised had they come down after crossing the Atlantic and taken another hop to New York. It would not have made their trip any the less successful, and would probably have allowed them to make a perfect three-point landing in New York—Stratford-Heaton-Berlin.

How the Rule Works

National Problem Doubly Faced When Man Ohtains Job

As a national problem a man thrown out of work is only half the mischief done. It means one less worker to carry the burden of one more dependent. Fortunately the rule works the other way when it comes to increased employment. A man in a new job means for the whole nation one more worker to carry one less dependent.

Supposing that at the depth of the depression in March we had 12,000,000 persons idle, it would mean that we had 36,000,000 persons at work. We had three people with jobs to carry one without a job. If today employment has increased by 3,500,000 jobs, it means very nearly 40,000,000 persons at work, against 8,500,000 persons still idle. We have almost five workers to carry one idle person. The social burden is almost cut in two.—New York Times.

Makes a Difference

No Must in Threshing Machine When Crops Are Poor

There is not much music in the threshing machine in these hopeless years. Its engine has a monotonous chug. The grain that pours out of its spout is small in quantity. The straw that pours from it easily finds room for itself in the yard. This lack of a prosperous look makes its dust more oppressive. The soft-tongued me about the machines are silent, and the rest are talking politics in rasping voices. Poor markets and disappointing crops when they fall together, spoil the harmony of the threshing machine.

VILLAGE POLICEMAN: "An Actress—that's what she is. I produce me book, she snatches it, writes 'er autograph—an' buzzes off!"—The Humorist, London.

WIFE'S DELIGHT AT HUSBAND'S LOSS

30 Pounds of Fat!

Here is something all wives of fat men will be glad to know. It is the experience of a woman whose husband recently weighed 230 lbs. She writes:

"I really feel I must write and tell you that, after taking Kruschen Sals for nearly 3 months, my husband has lost weight down from 230 lbs. to 200 lbs. This has been achieved by nothing else but Kruschen. I am too heavy also, and I started taking Kruschen only three weeks ago. Already I have got down from 153 lbs. to 144 lbs. We are delighted."

(Mrs.) C. Kruschen combats the cause of fat by assisting the internal organs to perform their functions properly. To throw off each day those waste products and poisons which, if allowed to accumulate, will be converted by the body's chemistry into fatty tissue.

Ekimo Slaying

Village Bad Man Killed By Other Members Of The Tribe

Story of the slaying of an Ekimo village "bad man" by other members of the tribe, is told in a wireless message received at Ropal Canadian Mounted police headquarters at Ottawa from Inspector T. Sandys Wunsch, on board the Northern supply steamer "Nascopee."

Oo-Shoak-Juke, an Ekimo who 13 years ago killed a fellow-aborigine at Cape Dorset, in Baffin Land, met retribution six months ago, when his own life was taken by a trio of Ekimos whom Oo-Shoak-Juke had been threatening.

The dead native was regarded as insane. He had shot at his wife some time before his own death, and for no apparent reason he had informed the three men who eventually killed him that he intended shooting them.

The trio forestalled him, and took the law into their own hands. They decided that the tribe would be better off without Oo-Shoak-Juke, and forthwith shot him.

When Inspector Sandys-Wunsch reached Wostenholme on board the "Nascopee," the tribal chieftain and all interested parties were produced and an inquiry set on foot. The inquiry determined that the three men who had killed Oo-Shoak-Juke were responsible for "Enterprise's" victory, in the last cup race.

Almost a sure sign "Velashed" was built to challenge for the cup is the fact that it is 88 feet on the water—127 feet overall. That is longer than "Shamrock V" which felt the need of more length in the rougher American waters where the cup course is laid.

"Shamrock," moreover, was noticeably inferior to "Enterprise" in sailing to windward. "Velashed" is an improvement in this respect.

Otherwise the new cutter adheres pretty much to the international specifications for "J" class yachts. It is of slightly more than 200 tons, has a sail area of 7,500 feet, a 158-foot mast, a beam of 21 feet and draft of 15 feet lead keels weigh about 80 tons.

"The Other Club"

Distinguished Organization In London Celebrates Twenty-First Birthday

One of the most distinguished dining clubs in the world, known as "The Other Club," has just celebrated its 21st birthday by a dinner at the Savoy Hotel, London, England, among the guests being Sir William Jowett, former Attorney-General, and Lord Kylsant, former President of the Federation of Chambers of Commerce of the British Empire, General Jan Christian Smuts, South African statesman, presided at the coming-of-age party.

The club, founded by Winston Churchill, and the late Lord Birkhead meets once a fortnight for dinner in a private room at the Savoy during the time that Parliament is sitting. It was intended to provide a ground whereon political opponents might meet. One of its rules is that "nothing in the intercourse of the members shall be allowed to interfere with the full asperities of party politics."

Wheat Exports

July was a Banner Month For Canadian Farmers. Measured in dollars and cents, July, 1933, was a banner month for the Canadian farmers. Canadians sold 16,373,500 bushels of wheat to world markets, receiving \$12,302,600, an average of 75 cents a bushel. The average return in July, 1932, was 57 cents and in July, 1931, 61 cents.

In July last year, the export of wheat—16,320,200 bushels—was higher than this year, but the return of \$11,209,600 was considerably lower, making the average price 57 cents a bushel. In July, 1931, 12,060,800 bushels were exported at an average price of 61 cents a bushel.

About 450,000 different kinds of insects are known and several thousand new ones are discovered each year.

Britain May Capture Coveted American Cup

Now All-Steel Cutter Revives Hope Of Sportsmen

A beautiful new streamlined racing cutter, winning race after race by spectacular margins, suddenly has revived British hopes of capturing the American cup.

The cup—"that old mug" so persistently pursued by Sir Thomas Lipton for 33 years—probably is being coveted by British sportsmen than any other trophy in the world. Why Britain never has been able to regain it since it crossed the Atlantic in 1851 is a riddle.

But British believe that the answer has been found in "Velashed," an ultra-modern all-steel creation of Charles E. Nicholson, who designed the last two Shamrocks for Sir Thomas Lipton. "Velashed" embodies all the lessons Nicholson learned from the defeat of "Shamrock V" by Harold Vanderbilt's "Enterprise" in 1930.

The success of the new cutter has made it almost certain that her owner, W. L. Stephenson, will succeed the picturesque and beloved Sir Thomas as skipper of the cup. Stephenson, chairman of the British subsidiary of F. W. Woolworth & Co., named the yacht after his three daughters, Velma, Stella and Daphne.

No contest could be held this year, since the challenge must be made at least six months before the race, but British yachtsmen believe Stephenson will issue it in the fall if "Velashed" keeps on winning. In the great Scottish racing festival known as the "Clyde Portnight," which just ended, "Velashed" won five first prizes, six seconds out of nine races over "Shamrock V," and King George's "Britannia. The two wins "Shamrock" scored over "Velashed" were by margins of only a few seconds, while all "Velashed's" victories were decisive.

"Velashed's" chief feature, aside from her steel hull, is the now-famous "Park Avenue" boom, frankly copied from the "Enterprise" with a few new ideas added. It greatly speeds up handling of the material. Moreover, she is equipped with all the other time-saving mechanical devices which Lipton had been responsible for "Enterprise's" victory, in the last cup race.

Almost a sure sign "Velashed" was built to challenge for the cup is the fact that it is 88 feet on the water—127 feet overall. That is longer than "Shamrock V" which felt the need of more length in the rougher American waters where the cup course is laid.

"Shamrock," moreover, was noticeably inferior to "Enterprise" in sailing to windward. "Velashed" is an improvement in this respect. Otherwise the new cutter adheres pretty much to the international specifications for "J" class yachts. It is of slightly more than 200 tons, has a sail area of 7,500 feet, a 158-foot mast, a beam of 21 feet and draft of 15 feet lead keels weigh about 80 tons.

Smoke Best

Young Man Smoke Best!

Smoke Best—and you'll soon be an Ogden's Cut Plug fan.

It makes no difference what kind of a pipe you smoke. It will be a far better and more satisfying pipe when you light up a bowlful of Ogden's Cut Plug.

It's fragrant... and cool... and mellow... as chummy a pipe tobacco as you ever touched a light to!

OGDEN'S CUT PLUG

If you "roll your own," use Ogden's fine cut cigarette tobacco and Chantrel cigarette papers

Ambassador To Russia

Viscount Chilton To Represent Britain At Moscow

The king has approved the appointment of Viscount Chilton as ambassador to Russia, succeeding Sir Ronald Overy. His majesty received the new ambassador in audience at Buckingham Palace.

Lord Chilton has been minister at Budapest since 1928. He will leave for Moscow in September, when for the first time since March 30 the United Kingdom will be represented in Russia by a full-fledged ambassador.

Not Good For Business

Wheat At Low Levels Keeps World From Prosperity

British millers and corn merchants do not want wheat to remain at a low price, Sir Albert Humphries, representative of Old Country millers, interests, told delegates to the World's Grain Conference at Regina. "It is not good for the producer, miller or the people as a whole for wheat to remain at low levels," Sir Albert stated. "If agriculture in the widest sense can be made prosperous, then the whole world will very shortly become more prosperous as well," he added.

S. S. Pennyworth First Ship To Reach Churchill This Season

Churchill, Man.—First mercantile marine trader to enter this northern Manitoba harbor this season, S.S. Pennyworth, steamed slowly into port Sunday night. Elevator sirens and boat whistles greeted the traditional noisy welcome as the British tramp steamer hove in sight, winner of a thrilling race "down the straits" with three other merchantmen.

Battling a gale of ocean proportions on the last lap of her voyage from the United Kingdom, the "Pennyworth," one of a fleet of 10 boats to trade into this port this year, neared alongside the huge modern elevator a full month ahead of the 1931 schedule set by S.S. Farnsworth.

Close behind her in the race to port were the S.S. Rio Clara, S.S. Brandon and the steamer "Sierents." The "Pennyworth" carried an assorted cargo of merchandise destined for prairie points, and a crew of men was put to work immediately unloading the big freighter.

At the dock, wheat trimmers stood by ready to swing out fleet of 10 spouts to fill the holds of the steamer with the first cargo of wheat outward bound from Churchill this season. The first ship to accomplish two voyages into Churchill, the "Pennyworth" may achieve a third before the season is ended.

Bedecked with flags from stem to stern the "Pennyworth" set a record for the passage through Hudson Strait, which she negotiated in three days. Captain W. A. Gilton reported a perfect voyage in crossing the Atlantic. The "Rio Clara," "Brandon" and "Sierents" are not expected to reach Churchill until late this week.

With more than 20 vessels scheduled to dock here this season, a conservative estimate of the total amount of grain to pass through this northern sea highway is placed between 7,000,000 and 10,000,000 bushels.

Little ice was encountered by the "Pennyworth," Captain Gilton said, and on this year's showing the insurance season should be made longer. The aid rendered by the ice-breaker "McLean" he said was valuable.

Receive Warm Welcome

People in Peace River Country Travel Miles To Greet

Besborough, Alberta.—Along the far flung Peace River front ringing cheers welcomed to that country Canada's Governor-General, the Earl of Beesborough, accompanied by the Countess of Beesborough and party. Their Excellencies were feted all along the route on their first day's tour of the country. People came from miles around displaying the spirit of the early pioneers, to vie with each other in welcoming the vice-regent and countess.

A warm welcome at McLennan, the first stop, was followed by receptions at Father and Peace River.

Perfect weather prevailed to mark their Excellencies' visit to the north country, a visit which they had planned last year but which had to be postponed.

Program Is Completed

Churchill, Man.—The week ending August fifth saw the summer program of the Hudson Bay Railway ballasting and re-conditioning operations practically at an end. During the week the industrial spur running along the Manitoba government townsite, was completed. This spur is about one mile in length.

Tension In Ireland Increases With Attack On Eamon De Valera

Dublin, Irish Free State.—Political tension increased with a bitter attack on President Eamon De Valera published in the "United Irishman," official organ of former president William T. Cosgrave's party.

An allegation in the Cosgrave publication was that last week, when government officers were confiscating revolvers held by private citizens, collectors for the Irish Republican army were making a house-to-house canvass in Dublin asking for subscriptions to "arm and equip" the I.R.A.

Eggs For Northern Port

Two Hundred Dozen Shipped To

Churchill, Man.—Fresh eggs that likely won't be so fresh when they reach their destination, left Tuna recently. Two hundred and ten dozen were consigned to Sergeant Wight and Constable N. Yates at Chesterfield Inlet, N.W.T.

These eggs, packed in salt, will be food for these polemen in the north next winter. Eggs are scarce up there and fresh eggs unknown that far north.

Constable Yates, an Ituna farm lad, wrote home before he went north he never dreamt that he could eat "rejected" eggs but has learnt how since. Eggs packed in salt will keep good for over a year. They will go via railroad to Churchill and from there will be transported to Chesterfield Inlet, on Hudson's Bay Company's service boat.

Italian Aviator Victim Of Seaplane Accident

Motor Trouble Caused Machine To

Overturn During Takeoff

Horta, Azores.—Four Italian aviators, members of General Italo Balbo's seaplane squadron, were hurt when their plane overturned during the takeoff for Lisbon, Portugal. The flyers, Capt. Ranieri, the pilot; Lieut. Squaglia, Sergeant Cremaschi, mechanic, and Sergeant Boveri, radio operator, were taken to a hospital. Lieutenant Squaglia died as the result of congestion of the lungs.

Motor trouble caused the giant machine to turn over as it was leaving Ponta Delgada, Azores, with 14 others for Portugal and home, after flying thousands of miles from Italy to Chicago and back. In an accident at Amsterdam in the outward journey, one flyer was killed. The ill-fated ship was called the "It-Tiani."

U.S. Grain Code

Proposal For Fair Competition For

the Grain Exchanges

Washington.—A proposed code of fair competition for the grain exchanges, submitted to the farm adjustment administration, fixed definite minimum margins to be put up in virtually all speculative purchases of grain.

Other portions of the proposed code followed generally rules and regulations established since the recent drop in grain prices caused farm officials to ask the exchange officials to change the regulations.

Heretofore, however, the question of margin requirements on purchases has not been definitely fixed, the requirements being that the margin be "adequate."

The proposed code calls for regulation by the grain exchanges and the carrying into effect by their officials of the rules laid down.

Reduced Acreage

Ottawa, Ont.—Prairie farmers are not waiting for a world agreement to reduce wheat acreage—they're doing it themselves. The Dominion Bureau of Statistics reported that the acreage seeded to wheat in the three prairie provinces this year declined 1,218,000 acres from 1932, a reduction of 4.6 per cent. Oats acreage increased 412,000 acres or 4.8 per cent; barley decreased 3.9 per cent; rye, 26 per cent and flax seed, 47 per cent.

No Trouble Anticipated At Banff Conference

Character Of The Discussion Will Be

Unofficial

New York.—Some difficulties not uncommon at international conferences will be absent at the sessions of the Institute of Pacific Relations in session at Banff, Alberta, according to Dr. James T. Shotwell of the American council, who is attending the conference.

The discussion will be directed at problems of international economic conflict. The unofficial character of the discussions, and the fact that the institute is concerned with a specific region instead of the whole world, are likely to lead to better understanding on the part of the nations concerned than might otherwise be possible.

"Although political problems will undoubtedly be discussed," Dr. Shotwell said, "the main emphasis of the conference, is to be on tariffs, trade restrictions, international capital movements and currency problems."

New Public School Readers

To Introduce Change For Western

Provinces When Conditions Permit

Banff, Alberta.—Introduction of new readers in public schools of the four western provinces will take place when financial conditions permit, it was decided at the meeting of the inter-provincial education committee here.

The committee consists of deputy ministers of education for the four western provinces. They are: Dr. Robert Fletcher, Manitoba; Dr. J. S. Huff, Saskatchewan; Dr. John T. Ross, Alberta; and Dr. S. J. Willis, British Columbia.

Hon. Perren Baker, minister of education for Alberta, also attended the meeting to discuss educational problems common to the four provinces.

A special committee studied the reader question and decided those now in use should be discarded in favor of up-to-date books when finances permit. The present readers have been in use for 15 years.

Send Out Strike Ballots

Railway Running Trades Prepare For

Momentous Struggle

Montreal, Que.—Members of the railway running trades have set September 15 for one of the most momentous decisions in the history of Canadian railroads. On that day 24,000 members of the union will be instructed by their general chairman as to the advisability of striking—last legal step in fighting a second 10 per cent. reduction in wages enforced by both the Canadian National and Canadian Pacific Railways.

Ballots were mailed to engineers, conductors, trainmen, telegraphers and signmen, marking the furthest step taken by any of the railroad unions in their fight against the reduction.

There is no change, it was stated, in the shop trades opposition to both the 10 per cent. reduction effected by the railroads at approximately a year's interval.

Dr. T. V. Soong (inset), Chinese Minister of Finance, who recently attended the World Economic Conference in London, England, has arrived at Ottawa to interview Hon. H. H. Stevens (above), Canadian Minister of Trade and Commerce, with a view to increasing the trade between Canada and the Orient.

CELEBRATES BIRTHDAY

Stanley Baldwin, Lord President of the Council and one of the most popular leaders Great Britain has ever produced, was the recipient of birthday greetings recently when he passed the sixty-sixth milestone.

Opens New Trail

Aviator Flies From Banff To Van-

couver Over Mountains

Banff, Alberta.—Flying in almost a bee line to the coast Captain Bill Holland pioneered a new trail from here to Vancouver making the trip in four and a half hours' flying time. Leaving here at 5 a.m., he said goodbye to guiding railway tracks about eight miles west of Banff and headed directly across the ranges.

Up and over historic Simpson Pass, across the Banff Windermere Highway, over the Brieco range and Brisco Village in the Columbia valley, over the Selkirk ranges and the "Little Known" lands immediately west of them, across the upper Arrowlake, then down at Vernon in the Okanagan to refuel his 300-horse-power Boeing hydroplane, was the first half on Holland's trip.

The second half took him across the interior plateau and the Cascade range. A line drawn on the map from Banff to Vancouver touches every place mentioned.

A few minutes after 10 a.m. word was received here from Vancouver announcing Holland's safe arrival there.

Previous flights to the coast have mainly followed the round-about route of the railroad so Captain Holland's feat opens up new possibilities in flying from the prairies to the coast.

B.C. Orientals Grow Poppies

Mounted Police Said To Be Investi-

gating Matter

Victoria, B.C.—Royal Canadian Mounted Police are believed to be investigating growth of poppies by Orientals on several tracts of land at Saanich near here. Under the law poppies may be grown but not harvested. Dried poppies brewed into tea have a morphine content of 8 per cent, according to medical authorities.

It is considered likely a test case may develop in anticipation of legislation at Ottawa forbidding growth of the flower altogether.

CHINESE MINISTER TO VISIT OTTAWA

Railwaymen Band Together To Oppose Reduction In Wages

London Wheat Conference

Representatives Of Wheat Exporting
Countries To Meet At Canada

Home

Ottawa, Ont.—Canada House in London, England, will see the reconvened meeting of the representatives of the wheat exporting and importing countries on August 21. It was learned at the office of Rt. Hon. Sir George Perley, acting deputy minister. Sir George has arranged, at the request of Prime Minister R. B. Bennett, to have Hon. M. A. MacPherson, provincial treasurer of Saskatchewan, attend the next session, and Mr. MacPherson is now en route.

Mr. Bennett and Hon. G. H. Ferguson, Canadian High Commissioner in London, will attend the meeting, which is called to explore further the problems respecting wheat production and marketing.

It is understood Mr. Bennett will leave for Canada shortly after the conclusion of this meeting, and that he will be accompanied by Mr. Ferguson, who is expected to make a short visit to Ontario.

Could Support Millions More

Ontario Attorney-General Foresees

Big Population For Canada

London, Eng.—The Daily Express in a despatch from Glasgow represented Hon. William Price, Ontario attorney-general, as saying Canada has room for 10,000,000 additional citizens and that the next generation should see a population of 25,000,000 in the Dominion.

The newspaper said Mr. Price told an audience in the Scottish Industrial city the United Kingdom government at present gets no return from the expenditures for able-bodied men, but that if these men were transferred to Canada something tangible would result, land would be developed and at the end of three years families taken to the call their own.

Banking Investigation

Most Important Matter Before Canadian People At Present Time

Winnipeg, Man.—"The royal commission on Canadian banking and currency by far the most important matter before the Canadian people at the present time," in the opinion of Hon. Ian Mackenzie, M.P., Vancouver Centre, in Winnipeg en route to Vancouver from Great Britain.

Mr. Mackenzie, who has ardently pressed for the commission since 1930, declared "recovery from our present alarming situation will be based on a proper financial system" and expressed entire approval as to the choice of Lord Macmillan as chairman of the commission.

Drouth And Heat Have Taken A Heavy Toll Of The Western Crop

Ottawa, Ont.—Canadian field crops will range from 16 to 57 per cent. below average this year, the Dominion Bureau of Statistics forecast today. Drouth and heat took heavy tolls of the crops, especially in Ontario and the prairie provinces.

The most damage during July was done to crops of flax, wheat, barley and oats, the survey showed. The flax crop, on a greatly reduced acreage, was judged to be 43 per cent. of average at July 31. The condition of the wheat crop was shown to be 37 per cent. of average which with the exception of 1931 was the lowest figure at that date in the records of the bureau.

The coarse grains also suffered from drouth, the Bureau reported, and prospects were for about two-thirds of an average yield. Potatoes were placed at 84 per cent. of average. Considering all crops, the yield prospects for 1933 were among the lowest on record for Canada.

The report said for the fifth successive year, conditions on the prairies grew worse in July. Compared with conditions at the end of June, the decline amounted to over 10 per cent. Manitoba's decline was 19 per cent., Saskatchewan's 30 per cent.,

Montreal, Que.—More than 200,000 representatives of the standard railroad labor organizations will band together in a monster co-operative association within the next two weeks, it was announced here.

The association, the outgrowth of a meeting of railroad labor representatives, is being organized for "industrial, economic and legislative purposes in general and in particular to oppose the present unjust and unwarranted wage cut proposed by Canadian railways."

The new association, it was explained, is the outcome of the unanimous voting separately taken decision of each section of railroad labor to refuse to accept the second 10 per cent. wage reduction demanded by both the Canadian National and Canadian Pacific Railways.

At the meeting Friday afternoon, representatives of all organizations declared their memberships were emphatically opposed to further wage reductions or deductions. The men realize that all Canadian citizens are most vitally interested in national recovery and are firm in their conviction, as they believe most citizens are, that the surest and quickest way to bring this about is by increasing purchasing power, not by further reducing it as is being done.

"Officers of the various organizations are hopeful that the new association will be completed within a very short time and they desire to make it abundantly clear it is not one big union, as each organization will retain its identity and autonomy," said the statement.

Railroad labor sections to be included in the association are: The Brotherhood of Locomotive Engineers, the Brotherhood of Locomotive Firemen and Enginemen, the Order of Railroad Conductors, the Brotherhood of Railroad Trainmen, and the Order of Railroad Telegraphers, all of which are generally known as the "running trades." Orders composed of members belonging to the shop trades will also be included.

A strike ballot which has already been mailed to the 24,000 members of the union is returned Sunday.

The maintenance-of-way employees were in conference with railway executives Friday night to make official their refusal to accept the additional 10 per cent. cut. They were also understood to be prepared to demand return of the 1933 which reduced the mill rate 1.70 mills below last year's rate.

The shop trades have rejected both 10 per cent. wage cuts.

Reduce Tax Rate

Prince Albert.—Local tax payers heard good news when they learned the city council had approved tax rates for 1933 which reduced the mill rate 1.70 mills below last year's rate. Public school supporters will pay 48 mills, and separate school supporters 44.20 mills.

NOTES AND COMMENTS

The benefits of an increased payroll at International mines since the opening of 1933, through added employment on resumption of coke manufacturing by the company, is reflected in all lines of business in Coleman. New houses, improvements to others. New business places opened, and increased activity is quite noticeable, making a marked improvement over local conditions of the last three years.

Job of biblical lore is famed for saving a patient man. Patient is indeed a virtue which is to be commended and admired. People who haven't any ability to manage their own affairs, but who are profuse in selling how the ills from which they suffer should be remedied, require something more than patience to take care of them. Those who are active in doing the best to provide relief, in spending countless hours in trying to solve problems, not infrequently receive abuse from those they try to relieve.

There is no excuse for single unemployed men to resort to begging in the Pass towns. The federal relief camp west of Coleman is equipped to provide for 100 men, and if a man refuses to go to work there, he is not making an honest endeavor to help himself. Men who refuse to avail themselves of this work until they can by their own efforts find something better, are not deserving of help from the general public.

While many towns on the prairie have to curtail the use of water during the dry summer periods, towns in the mountains which have a water distribution system set no limits. Pure water in abundance is one of the assets which we overlook the value of until we notice the restrictions which prairie town dwellers are compelled to observe to conserve their supply for absolute necessary purposes.

Blairmore town council endorsed a petition to the Federal government demanding among other things the abolition of the mounted police. People living in Pass towns who remember the disorderly conduct caused by agitators in 1932 over labor disputes do not agree with such views, for the Federal force is far more efficient in maintaining order and preventing riots than any local police could be. It is hardly expected serious attention will be given to such demands as contained in the petition.

Wild, wild women! Rev. Roy Taylor in his sermon Sunday morning stated that the women attending wrestling matches in Vancouver were more vicious than the men, and clamored for the wrestlers to break each other's heads and arms and what-not. Those who saw them in action at the Bellevue riots in May 1932 did not incline to the opinion that they were the weaker sex. "Lady of Spain I Adore You" hardly fits into the picture if they are as wild as that. There are many of the Amazon type who do not live in South America.

One hundred millions of gas yearly from coal, jobs for 7,000 men, and motor fuel at 14¢ a gallon is the news broadcasted by the British United Press despatch of August 12 from London. The new fuel has been used with success in warships, airplanes and every type of motor vehicle. After years of experiments by scientists all over the world at an estimated cost of \$250,000,000 coal is again likely to become pre-eminent in transportation and industry.

So many dumping spots for household refuse offend the eye that many are of the opinion that a scavenger service should be established by the council. It would, in addition to clearing away unsightly rubbish from prominent places, furnish employment to men who urgently need it. The slight annual cost to householders would not be objected to by the majority who desire to see a cleaner town.

A town and its activities are but the reflex of the people who live in it. Remember this when you are inclined to knock the town you are living in. "It isn't the town; it's YOU" is the answer.

STONEBORD means Fireproof—Absolute protection plus insulation against heat or cold. Damp proof and harder, a wall surface that resists scuffing and takes all finishes. Will outlast any other wall-board made, costs less. In stock at J. S. D'APPOLONIA.

CLASSIFIED ADVERTISEMENTS

FOR SALE—Oak arm chairs, genuine leather upholstered, fumed oak finish, one rocker, \$10 each. One library table with drawers \$14. All in good condition, on view at Earle Bowen's furniture store.

FOR SALE—Fire Wood, in stove lengths or logs, large load \$5. Agent for Lundbreck coal. Moving and hauling of all kinds. Alex L. Easton.

FOR SALE—Shot gun in good condition. Apply to Mrs. John Watson, Creston, B. O. or Journal office.

FOR SALE or will trade for fruit, three fresh cows, Milking Shorthorns and very gentle. Apply to G. Hole, Twin Butte, Alberta.

FOR SALE—5-roomed House, light and water. Cheap for cash. Apply to Mrs. Godfrey, two and a half miles West of Coleman.

FOR SALE—1928 Chevrolet Ton Truck in good shape, new pistons, fenders, battery, etc. Good tires. Apply to E. W. Brown, Fernie Meat Market, Fernie, B. C.

Counter Check Books may now be obtained through The Journal office, quality books at lowest current prices sold. Keep this in mind when you are asked for orders by out-of-town salesmen, and place your order locally.

Your eyes say
IT'S A BEAUTY
Your Pocketbook says **YOU SAVE**

YOU must have noticed what a wonderful way the new Chevrolet has with the ladies. How feminine eyes so often linger long on Chevrolet's trim, sparkling Fisher bodies. How feminine hands take so naturally to Chevrolet's easy handling and control. How fresh-coiffed feminine heads approve of No-Draft Ventilation.

Then there's the matter of economy. Try to find the woman—or the man—who isn't interested in saving money this year, and therefore enthusiastic over the way Chevrolet does it: With the lowest price of any full-size, closed Six! With the lowest cost for gas and oil of any standard car! With the best reputation of any low-priced

car for carefree service and freedom from repairs!

All of which brings us to the thing that everybody likes most—Chevrolet's quality! Here is a big, powerful Six . . . with a smooth, snappy engine that has been proved by thousands of owners . . . a wood-and-steel Fisher body, the strongest and safest known . . . a husky frame and chassis that stays sturdy and tight over years of use . . . and upholstery, fittings and interior luxury far ahead of anything else in Chevrolet's field. Chevrolet owners have proved that Canada's smartest low-priced car saves you more on everything. And no doubt that's the reason why Chevrolet leads all cars in sales, from end of the country to the other.

Broomhall Declares Canadian Wheat Will Always Be At A Premium In Markets Of World

Canada's wheat still stood supreme as the world's grain show and conference came to a close at Regina. Pockets the biggest winners of the \$100,000 in cash prizes, the Dominion's farmers saw their banner at the top of the mast, with hopes rising that demand for Canadian wheat from foreign countries will cut down the 1933 carryover. Experts who attended that conference gave farmers encouragement in disclosing European countries wanted the Canadian grain.

The high share of the prize money from all grains went to the Dominion. Its growers took \$54,873, more than double the \$25,536 which went to United States growers and \$8,221 won by farmers in countries other than Canada and the United States. Approximately \$2,000 of the prize money was not awarded because judges felt some entries were not worthy.

A carryover of Canadian wheat of approximately 200,000,000 bushels, as the cereal year ended July 31, compared with 12,962,961 bushels at the same date at the close of the previous cereal year, was a problem for farmers to ponder in view of their top-rated wheat.

But the Canadian growers were given assurance it was not the lack of quality in their product that kept it from being purchased in still larger quantities on international wheat markets. In a paper to the conference, Broomhall, declared it was protection by foreign countries which caused the difficulties.

All millers, Broomhall disclosed, did not and could not buy Canadian wheat because of high duties and milling restrictions of importing countries. Millers wanted Canadian wheat, and the conference was told, Canadian wheat will always be at a premium in the markets of the world. The message was echoed by other experts.

Led by the newly crowned wheat king, Frelund Wilford, of Staveland, and the noted northern grower, Herman Treile, of Wembley, Alberta captured the greatest share of the prize money going to Canadian wheat. Earnings were \$25,152, almost equal to the total amount won by United States farmers.

Saskatchewan was second in the list, earning \$12,333 with British Columbia, third, earning \$11,427; Ontario, \$7,992; Manitoba, \$6,183; while the balance was spread between Quebec, New Brunswick, Prince Edward Island and Nova Scotia. Earnings of countries other than Canada and the United States were: Australia, \$4,766; Slam, \$741; British Guiana, \$300; New Zealand, \$150; Ireland, \$150; England, \$101; Scotland, \$49; Southern Rhodesia, \$40; India, \$34.

The curtain rang down on the greatest grain show ever held in the Dominion, while proposals were being pressed to establish a permanent branch of the Federal Department of Agriculture to stimulate wheat sales at future times. Another world's show for the Dominion, probably somewhere in the eastern provinces, is being suggested for 1938.

Fisheries Production

Had a Market Value Of Nearly \$26,000,000 Last Year
Canada's fisheries production in the calendar year 1932, as shown by statistics prepared for publication by the Dominion Department of Fisheries and the Dominion Bureau of Statistics jointly, had a marketed value of nearly \$26,000,000—to be exact, \$25,997,133. Of this total, \$21,763,111 came from sea fisheries production and \$4,194,022 from the inland or freshwater fisheries.

The year's aggregate was \$4,560,175 less than the 1931 total, and the falling off is explained, of course, by the disturbed world economic conditions which prevailed. Fish were as plentiful as ever in Canada's vast extent of fishing waters but marketing was difficult and prices low. The Dominion's fisheries figures will climb again as normal world conditions return.

Fisheries production value showed a decrease in each of the provinces and in the Yukon Territory in 1932, although in Alberta there was a drop of only a couple of hundred dollars and the Manitoba decrease was relatively small. By provinces, the marketed value was as follows:

British Columbia	\$9,900,116
Nova Scotia	5,557,943
New Brunswick	2,972,708
Ontario	2,147,990
Quebec	1,815,544
Manitoba	1,204,892
Prince Edward Island	988,919
Saskatchewan	186,174
Alberta	153,749
Yukon Territory	20,060

W. N. U. 2007

Record Shattering Flight

Some Of The Elements Listed Which Contributed To Success
When Maurice Rose and Paul Coda, the Frenchmen, set their \$100,000 piece of flying machinery down in Syria after a record-shattering flight from New York, they could well give thanks to the following:

1. A mile-long concrete runway at Floyd Bennett airport that enabled them to take off safely under the heaviest fuel load ever carried by a single-motored "plane, nearly seven tons.

2. Some 30 delicate instruments which made it possible for them to fly blind through storm and darkness.

3. A superb motor.

Thus did Clarence D. Chamberlin, pioneer trans-Atlantic flier himself, who designed the runway, but modestly refused to talk much about the part it played in the flight, summarize the elements which enabled the Frenchmen to win through.

"The instruments are the thing," Chamberlin said, "in this flying business."

Squadron Leader Oswald R. Gayford and Flight Lieutenant Gilbert E. Nicholls, last February flew 5,310 miles from Gravesend, England, to Walsh Bay, southwest Africa. Their record surpassed that made by the late Russell Boardman and John Polando in 1931 in their flight from New York to Istanbul, Turkey, of 5,012 miles.

Decrease In Production

Output Of Six Leading Minerals Down For First Five Months Of Year

Six of Canada's leading minerals showed decreased production figures for the first five months of the year, and one an increase, it was reported by the Dominion Bureau of Statistics. Lead production increased from 104,729,200 pounds last year to 109,097,200 pounds in 1933.

Cool production to May 31, this year, was 4,215,500 tons, and last year, 4,906,500 tons. Copper production was 102,657,000 pounds against 1,196,512 zinc ounces in 1933, compared with 1,230,294 ounces. Nickel production at 14,666,600 pounds was 3,833,800 pounds below 1932. Silver mines produced 5,504,279 fine ounces a decrease of 1,392,078. Zinc production dropped from 74,299,200 pounds last year to 67,960,746 in 1933.

Professor Met His Match

Quick-Witted Student Found Flaw In His Deduction

The professor thought he was clever, but one day he met his match. "Arithmetic," he commenced his lecture, is a science of truth. Figures cannot lie. For instance, if one man can build a house in twelve days, twelve men can build it in one day. A quick-witted student rose to his feet. "Yes," he said: "then 238 men can build it in one hour, 17,280 in one minute, and 1,036,800 in one second. I'm sure of them couldn't lay a brick in that time."

While the class and the professor were still gawping the student went on: "Again, if one ship can cross the Atlantic in six days, six ships can cross it in one day. That's not possible, either."

Production Of Foot Wear

June Output Was The Largest Since 1929

The June production of leather footwear in Canada at 1,905,671 pairs, was the largest output recorded for any month since January, 1929, a Dominion Bureau of Statistics report says. That figure represents an increase of 211,083 pairs of 12 per cent. over the preceding month and an increase of 406,455 pairs or 26 per cent. for the corresponding period last year.

Exports of leather footwear in June last amounted to 2,031 pairs, an increase over the preceding month of 1,659 pairs and an increase of 776 pairs over June, 1932.

Olive oil produced in Spain this year is expected to weigh 440,000 tons, the largest in years.

Canada's export market for raw materials in Japan is gradually increasing.

In far northern Siberia the ice does not break up in the rivers until June,

Cheaper Than Detective

Berlin Police Furnish Personal Information For Twelve Cents

It costs only 12 cents to find out all about the lady in Berlin. Whereas lovers swains (or more often ambitious dowry-chasers) in France have to hire private detectives or bribe janitors in order to ascertain whether she is single, married, divorced, 21, or 48, rich or poor—the obliging Berlin police, under new regulations, furnish all the information for 60 pfennings.

Being German police, and therefore thoroughness personified, they keep tabs on everybody. And being police, and therefore proverbially unsentimental, they will not only divulge the above-mentioned data, but come through with her religion, birthplace, and maiden name.

The lady, if she wants to get even can do the same. She may obtain, for the same fee, the gentleman's full name, profession, parents' names, and previous residence. If he has real property, she is entitled to know that too.

To prove that sophisticated Berliners are just as inquisitive as smaller folk, written or personal requests for information of this sort in the past, under more stringent regulations, averaged 500,000 a year.

Keep Eyes On Road

Dangers For Motorist To Relax Vigilance Even For Second

It is dangerous to take the eyes off the road for even a second in this day of high speed driving. If the motorist is driving at thirty miles an hour, his car is going at the rate of forty-four feet each second. If another car is coming toward him at the same speed the cars are approaching at the rate of eighty-eight feet per second.

When travelling at sixty miles an hour and approaching another car going at the same speed in the opposite direction, the two cars are coming together at the rate of 176 feet in one second. It is easy to see that in circumstances such as these it is not safe to have to look for more than a fraction of a second at the speedometer, oil gauge or any other dash device.

Literacy In Canada

Slightly More Women Than Men In Canada Can Read and Write
Women have a higher degree of literacy in Canada than men, it was shown in the 1931 Dominion census. The survey showed that 95.7 per cent. of Canada's male population above the age of 10 could read and write and 96.3 per cent. of females.

Ontario had the highest percentage of literacy of any of the provinces, 97.4 per cent. followed by Prince Edward Island with 96.6 per cent. New Brunswick had the lowest percentage, 92.38. The percentages for the other provinces were: Nova Scotia, 95.07; Quebec, 94.5; Manitoba, 95.1; Saskatchewan, 95.3; Alberta, 96.1; and British Columbia 95.7.

Twenty-three weather stations have been abandoned without any improvement that we can notice.

Shanghai's latest skyscraper, which has 22 stories, will be occupied by a bank and an apartment hotel.

Trinidad's famous lake of natural asphalt is 114 acres in extent.

By Ruth Rogers

SPORTS TAILORED JUMPER DRESS IN DUAL MODE

It is navy blue crinkly crepe silk with a fresh white tubular crepe silk girdle.

The leather belt is coral-red. The blue bone buttons have coral-red rims. Then there is still another touch of red at the neckline in the pert crepe silk tie.

It's so girlish and smart. It could also be worn with a white organdie girdle.

A coral-red crepe silk printed girdle with long sleeves offers still another design.

Style No. 709 is designed in sizes 14, 16, 18, 20 years, 36, 38 and 40 inches bust. Size 16 requires 2 1/2 yards 35-inch for dress, with 2 yards 35-inch for blouse.

Price of pattern 20 cents in stamps or coin (a preferred). Wrap coin carefully.

Will Try It Again

James Mollison, trans-Atlantic flyer, telephoned to friends in London that he and his wife, Amy, after returning to England by steamship, planned to fly to the United States again, and then carry out their aim as far as possible eastward, hoping to better the long distance flight record. It was expected the flight would be made next year.

Elaborates General Plan For British Community Settlements Under Migration Scheme

Wooden Relic Found

Embedded In Rock Age Is Set At 50,000 Years

Harold Putnam, deputy magistrate for Truro, Nova Scotia, has a relic which he believes may recall the days of a million years or more ago. Going to the Salmon River for a flat stone, Robert Fielding found one suitable for a step to Mr. Putnam's garage. On close examination it was found that embedded in the rock was a petrified stick of wood. That the wood has been treated by human hands the exhibit gives every indication.

Judging by the rock, which is said to have been brought from Wallace for a railway bridge at Truro, the relic is set at a million years or more and for the wood to become embedded in it showed that the stick is at least a million years old. Around Great Village are many fossils showing the movements of animals of the age gone by, but the exhibit which Mr. Putnam guards very closely is believed will show the methods and modes of prehistoric humans.

Grooves at equal spaces apart that might have been made by man or machine are discernible and a sort of corrugation lengthwise, the stick gave further evidence that the wood was used for some implement or weapon. A stone cutler will be engaged to cut away a portion of the rock so that more of the petrified stick might be seen.

The stick is at least three inches in diameter and more than ten inches long. The ends are not exposed and it was used for some implement or a tool of some kind used in the prehistoric ages.

Brighter Prospects

Improvement In Business Conditions Sighted In Bank Letter

Momentum attained by business during the second quarter of 1933 has carried several industries to higher levels though July, states the August commercial letter of the Canadian Bank of Commerce.

"It may therefore be expected that complete reports for the past month will show the volume of business as a whole to have been maintained at about the June level.

In view of the serious crop damage, the breakdown of the World Economic Conference and recent stock market losses, this stability should be regarded as the best showing possible," the letter continues.

The 1933-34 "wheat year" opens now with a short new carry-over certainty, the letter continues, but the abnormally large carry-over of old wheat, some 200,000,000 bushels will make up for the shortage of the new crop and "Canada will therefore have for the coming 'wheat year' a normal supply and an exportable surplus practically equal to the exports recorded for the 1932-33 year."

Opposed To Replacement

His car had taken fire and was destroyed. It being insured he went at once to the insurance office and demanded his money. He was given a claim form to fill up, and was told he would not get the money, but that the car would be replaced.

"Oh!" said he, "if that's the way you do business give me back the premium I paid the other day on my wife's policy!"

Declaring opinion in favor of resumption of immigration on a normal scale seems to be gaining ground throughout Canada, and according to his plan has the broad support of the Dominion and provincial governments, Brig-General M. I. Hornby has circulated a new explanation of his plan for "British community settlements" in Canada.

The Hornby plan would send to the Dominion small communities of selected British families, established on areas of proven good mixed-farming land of 5,000 to 10,000 acres in extent, to be sponsored by existing voluntary migration committees of the counties and towns in the United Kingdom.

Declaring Canada, by the establishment of so great transportation, educational and other services, has already made its share of any 50-50 financing, Brig-General Hornby proposes the United Kingdom make the necessary loans available to the county city or town committees here at a low rate of interest.

Brig-General Hornby declares the objective of the plan is to establish what may be called "Foundation Community Farm Settlements," small communities of selected British families, established on areas of proven good mixed-farming land of 5,000 to 10,000 acres in extent, in sponsoring the new settlements by the existing county and town voluntary migration committees the object in view is to bring into play the very strong county and town spirit which exists throughout the United Kingdom.

Each committee would acquire by purchase a block of from 5,000 to 10,000 acres of well-situated farm land suitable for mixed farming. The land would be held by the committee in perpetuity, it would not be sold to the individual settlers but would be worked by them on a rental basis, the rental being a proportion of the annual produce. Each committee would select a settlement manager or supervisor from this district from which the settlers come and through this manager would subdivide and develop the area into suitable farm holdings of varying sizes. This manager would have the assistance of a field foreman and other staff with local Canadian experience.

In order to safeguard the committee's interest in the matter of land purchase it is proposed the Canadian Government be asked to nominate an advisory committee in each province, whose function would be to advise in the initial phase. The committee would guarantee that none of the settlers would be allowed to become public charges, at least during the five-year period during which the settler is acquiring legal Canadian domicile. It is not the purpose of the scheme that settlers remain permanently tenants on the committee's lands. After proving their ability to farm as tenants they would acquire farms of their own. The aim is to have the settler save as much as possible out of his returns during the first three to five years, or longer where necessary.

Soviet Harvesting Impeded

Machinery Repairs Lag and Fuel Deliveries Are Behind
Somewhat dismal is Pravda's summary of the news from Russia's southern grain front. It is unpleasantly reminiscent of last summer's harvesting reports.

Harvesting machines are reported unrepaired or badly repaired, with frequent breakdowns and availability for use only a small part of the time. Oil and gasoline deliveries have failed and there are shortages of parts, tools and skilled mechanics.

Some grain has been reaped green; some, fully ripe, has been left to drop to seed. Failure to bind and stack the grain after reaping is frequently noted and there is often a great disproportion between the acreage reaped and the quantity threshed. The "tempo" of the harvesting is slow and almost all regions are badly behind in their programs. Against all that, reports from everywhere indicate the crop is splendid.

One Of Hitler's Mistakes

Herr Hitler's worst performance is that he has systematically crushed all neighborly feeling on the part of Germans towards fellow-nations, and as systematically tried to rouse all the militarist mentality of a people susceptible to militarist suggestion. There are few worse crimes that could be committed in the present situation of the world—London Observer.

BRITISH DRIVER HOPES TO SET NEW RECORD

Our picture shows Mr. J. Cobb standing in front of his new Napier Ralston car, in which he hopes to maintain an average speed of 130 miles an hour for twenty-four hours at the Brooklands Track, London. During test on the track Mr. John Cobb topped the course at more than 130 miles an hour.

WORLD HAPPENINGS
BRIEFLY TOLD

Decline of 21,500 in the number of persons on relief in British Columbia between March and June of this year, is recorded in official figures released.

Crow's Nest Pass Coal Company of Fernie, B.C., has secured the entire contract of the Winnipeg Electric Company for coke, amounting to 50,000 tons a year. Formerly United States supplied Winnipeg firm.

Three white Leghorn chickens, owned by Harry Knapp, have been sent from Sault Ste. Marie, Ont., to Rome, Italy, where they will be exhibited in the world's poultry congress.

British Columbia lumbermen, particularly shingle manufacturers, are perturbed over possibility of an embargo being placed on their products by United States under the new Recovery act code.

Because of the increasing importance of Canada and other American nations in Japan's foreign relations, the foreign office is planning to establish a new affairs bureau to handle dealings with nations in north, south and central America.

This year's cotton production in the United States was forecast by the Department of Agriculture at 12,214,000 bales of 500 pound gross weight, compared with 23,002,508 bales last year.

John Cophthorne, 72, veteran of the John Rebellion, died at Victoria recently. A native of Cork, Ireland, he came to Canada in 1883 and for many years owned a cattle ranch, Jumping Pound, Alberta. He has been a resident of Victoria for 19 years.

Britain's disarmament gesture in reducing her navy by much more than 50 per cent. since the war has been ignored and it was time she returned to safety, Earl Jellicoe, former admiral of the fleet, declared when he opened naval week at Portsmouth.

Naphtha, previously wasted, is being rescued by the new Imperial Oil absorption plant in the Turner Valley oil fields, to the extent of 871 barrels a day, equivalent of first class producing wells' output. A total of 80,000,000 cubic feet of waste gas is being run through the new plant daily, from which the valuable naphtha is obtained.

Establish Weather Depots

Plan New Meteorological Stations Throughout the West

Proposals for the establishment of new meteorological stations throughout the west and for the providing of competent inspectors to provide accurate meteorological data in its relation to agriculture, are receiving the attention of both the federal and provincial governments.

Plans for the establishment of such a service were laid at a conference of federal and provincial authorities held in Regina, and announcement of them was made by Hon. J. F. Bryant, K.C., chairman of the Saskatchewan commission on conservation and afforestation, and chairman of the joint commission of the three prairie provinces.

The proposals embrace the establishment of meteorological stations with up-to-date equipment at the federal experimental farms, maintained by the provincial governments. The data and reports of these stations would be supplemented by data from similar stations located at strategic locations, in order to have records from all areas of the provinces concerned.

Peasants Had Good Idea

Easily Solved Problem Of Water-melon Burp in Bulgaria

Overproduction of watermelons has been solved by the peasants near Pestera, Bulgaria, without calling on economists for advice. To the neighboring village of St. Constantine come thousands of summer visitors, all fond of watermelons. The peasants, who have more than they can sell, take their surplus to huge boxes nailed to trees in the woods and deposit them there. Over the box is a sign: "Take as many as you want, and leave as much money as you wish." Few fail to pay a reasonable sum for the melons, the rustic melon shop does a thriving business and no racketeers have yet robbed the till.

A Godsend To Schoolboys

Recent Invention Is Wonderful Machine Which Solves Equation

One of the most remarkable of recent scientific discoveries is R. M. Mallock's invention of a machine which solves simultaneous equations. It consists essentially of a series of transformers each with a number of windings. By adjusting the number of turns on each of these and sending an electric current through one of the transformers, the machine is able to function and the solution of the equations may be read off directly by twirling a dial. As many as ten equations can be solved simultaneously.

W. N. U. 2007

A Novel Wireless

Conference Telephone Used At Stockholm Great Advantage To Delegates

At the World Power Conference held in the Stockholm concert house a striking technical novelty was introduced enabling audiences at conventional to listen to lectures in several languages simultaneously while moving about and without being disturbed by noise or by conversations between bystanders.

This new contrivance, called the conference telephone, constructed by the L. M. Ericson Telephone Company, is a portable wireless receiver outfit of tiny dimensions consisting of a coil antenna, placed around the shoulder, a small receiver box fixed in the button-hole or placed in a pocket and a head phone. The transmitter antenna is mounted around the walls of the conference room, so that the bearer of the receiver outfit can stand or move anywhere in the room while listening to the lecture, undisturbed by conversation of other members of the audience.

Another great advantage is the possibility of interpreting a lecture in different languages simultaneously. The interpreters sit in an adjoining room and send their interpretations over different wave-lengths for each language. The listener only has to choose the receiver outfit tuned to the wave-length of the language he prefers to hear. This will naturally greatly shorten the duration of the proceedings and forms an elegant solution of the difficulties previously encountered at conferences when using the costly and complicated method with fixed telephone receivers at each seat with cords that are apt to get entangled and cause inconvenience.

This revolutionizing innovation was enthusiastically received by the 900 members of the conference, who also admired other electric installations, including signal lights in different colors indicating the different languages used and an automatic telephone system between the conference officials.—St. Thomas Times-Journal.

Recipes For This Week

(By Betty Barclay)

MARVEL LEMON PIE

1 package lemon-flavored gelatin.
Grated rind and juice of 2 lemons.
2 egg yolks.
1 1/2 cups boiling water.
1/4 teaspoon salt.
1 baked 9-inch pie shell.
Combine gelatin, sugar, salt, and lemon rind with 3 tablespoons water. Add egg yolks and stir well. Add remaining water, stirring until gelatin is dissolved. Cool. Add lemon juice. Chill. When slightly thickened, turn into cold pie shell. Chill until firm. Cover with Three-Minute Meringue or top whipped cream.

Three Minute Meringue

2 egg whites, unbeaten.
2 tablespoons water.
1/4 cup sugar.

Few drops vanilla or almond extract.

Put egg whites, sugar, salt, and water in upper part of double boiler. Beat with rotary egg beater until thoroughly mixed. Place over rapidly boiling water, and beat 1 minute, then remove from fire, and continue beating 2 minutes longer, or until mixture will stand in peaks when flapping. Beat well. Spread over top of pie.

PEACH PIE GLAZE

8 (4 cups) fresh peaches, sliced.
1 package orange-flavored gelatin.
Dash of salt.
1/4 cup sugar.
1 1/2 cups boiling water.
1 baked 9-inch pie shell.
Combine peaches and sugar and let stand 10 minutes. Dissolve gelatin in boiling water, add salt, and pour over peaches, stirring occasionally as mixture cools. Chill until slightly thickened. Turn into cold pie shell. Chill until firm. Cover with Three-Minute Meringue, or top with whipped cream.

Grain Exhibition

Movement To Form Organization To Perpetuate Grain Conference
Formation of an international organization to perpetuate the World's Grain Exhibition and Conference is expected.

Success of the grain show in Regina has spurred international leaders to new plans. It is understood that the federal government through its department of agriculture, would set up a small department as the basis for a World's Grain Exhibition and Conference.

World Phone Lines Spread

Inauguration of telephone communication between India and Australia recently has continued the spread of the world service. Two days later India was connected with Palestine and South Africa. Since the opening of lines between India and England on May 1 an average of five calls a day have been made from Bombay.

A SMART DRESS—SLENDERIZING AND CHARMING

It is amazing at how easily it is fashioned. The moulded bodice cut in one to where the lower skirt joins, helps marvelously toward slenderizing. It can be belted if you wish. Horizontal pin tucks accent the waistline. And note the fitness of the blouse. The pointed outline at back and front are decidedly length giving features. Navy blue crepe silk is lovely for street, made the original. The trim is of blue and white crepe print. Style No. 363 is designed in sizes 36, 38, 40, 42, 44 and 46 inches bust. Size 36 requires 3 1/2 yards of 35-inch material with 1/4 yard of 35-inch contrasting. Thin woollens are nice medium. Price of pattern 20 cents in stamps or coin (coin is preferred). Wrap coin carefully.

Has Praise For Russia

Canadian Journalist Says Country Will Command World Attention

One of Canada's noted journalists, Robert J. Cronin, who was in New York on route home from a European trip, said Russia's "great progress, for a number of years, is going to command world attention, world admiration and, along certain lines, world emulation."

Cronin, editor and owner of the Vancouver Sun, said the Russians, "are in the beginning of an economic honeymoon."

"If there is one country in the world today which has found a real job to do and is wholeheartedly doing it, that country is Russia," he declared.

Cronin said he felt the principle of capitalism is sound, "but capitalism as we have over-emphasized it in the United States and Canada and England curtails production and distribution and thereby prevents the growth of appetite and desire."

"Where our economy is so wrong is that, as I see it, we emphasize the preservation and turnover of capital instead of emphasizing the turnover of goods."

With her business growth ahead, the Canadian said, "Russia is the safest credit bet available in the world today as a business man or a nation. I should feel more comfortable having money coming to me from the U.S.S.R. than from any other place on this globe."

The Soviet Union, Cronin said, "has vitality, ability and tremendous pride in the achievement and obligations of their new regime."

Something To Treasure

All Canadians Honor Memory Of Sir

Whitford Laurier

Down in Athabasca, Quebec, they are transforming Sir Whitford Laurier's old home into a national shrine. Everything is to be restored as Sir Whitford left it, even to the paper on the walls. His study will be recreated as he knew it, and a room he devoted to pictures and statuary of old Quebec will be preserved as it was when Sir Whitford made the house his home and retreat.

This is something in which all of us, no matter what our political allegiance, might wish to have a part. For as political controversies recede and worthwhile things are seen in true perspective, the memory of Laurier becomes something to treasure. He was not merely a great party leader and a great son of Quebec; he was a great Canadian, one who loved and served this country with a glory that belongs to us all. In perpetuating his name and fame, Canadians honor themselves.—Ottawa Journal.

No Thought Reader

They were "titting-out" at a dance, and for ten minutes he had sat gazing at her without uttering a word. "Obviously," he thought, "he wants to kiss me, but is too shy. I'll give him a lead."

So she murmured: "I believe I can read your thoughts."

"Then why don't you use your powder puff," he said "I think nothing makes a woman look more unattractive than a shiny nose."

GERMAN STUDENTS SEEK SCARS OF HONOR

HEIDELBERG DUELLISTS IN ACTION

Gunslinger Hits

With the lifting of the ban on duelling by Chancellor Adolf Hitler, Heidelberg University, historic seat of German culture, is once more the battle ground for the traditional student combats that provide the contestants with "scars of honor" that make the wearer a true son of the Fatherland. According to the new Heidelberg code, freshmen students must fight seven duels before they become full-fledged members of the fraternities to which they aspire. Although the duels are alarming to watch, very little damage accrues to the duellists. Surgeons are on hand to sterilize the weapons and to minister to the fighters when the much-desired scars have been acquired.

SUNDAY SCHOOL LESSON

August 20

SAMUEL

Golden Text: "Serve Jehovah with all your heart."—1 Samuel 12:20.
Lesson: 1 Samuel, Chapters 3, 7, 12.

Devotional Reading: Psalm 125.

Explanations and Comments

Samuel's Call, Chapter 3:1-9.—"The Hebrew word translated 'child' in the text is applied in the Bible to an infant and also to a man of forty. Joseph says Samuel had just completed his twelfth year when the word of the Lord came to him. If so, then he had reached the age that Jesus had when he dedicated himself to the Lord's business. Samuel helped Eli in the service of the temple, and seems to have been the special attendant of the aged man whose eyes had begun to grow dim."

The continuous growth of character, from a child serving God, and to old age walking in the same path, is the great lesson which the story of Samuel teaches us. "The child is father of the man," and all his long days are bound each to each by the religion. Pardon cleanses all, and even turns the memory of it into a new memory. It can match color of papers and inks, cover the thickness of paper being produced and detects breaks in the rolls of paper going into the printing presses and instantly stop the machines.

Electric eyes turn on and off the lights giving the course to ships and they do the same thing for flying fleets. The shadow of a girl on the door and it will open—if the electric eye is on its job—admitting the waitress and her tray.

How does it work? Scientists O. H. Caldwell, writing in the New York Times, says that it is through the selenium light sensitive cell. You illuminate a prepared bit of selenium and its resistance undergoes a sharp change; the electrical current that is flowing in the circuit suddenly increases and can be used to operate relays, which in turn work switches producing the desired result. The electric eyes isn't very yet, in fact it has just begun. Its destiny if it gets busy is to make electricity direct from sunlight. Upon every foot of the earth's surface the sun delivers 175 watts. An ordinary roof 30 ft. x 60 ft. is big enough to produce enough electricity to run a small house. It is estimated that enough sunlight falls on the deck of the Atlantic liners to drive them at full speed.—Winnipeg Free Press.

'I Like To Go When I Have To Go'

Traveller Gives Some Reasons Why

He Likes To Take a Train

When I make my plans to leave for somewhere at 7 o'clock I like to wait around till 8:15 before the last member of the party is ready. It wastes my time, spoils my disposition, and makes me late at the other end. That's why I like to take the train—it starts on schedule and arrives on time.

I hate to sit cramped for hours, accommodating my legs and feet to extra luggage on the floor. I like to travel—no matter how far I travel—and not take the train. I don't like to dole around giant motor-cars. They frighten me. They look dangerous. They make good drivers nervous. They make strong men to sweat and lovely ladies to scream. It's almost as bad to be scared half to death as it is to be killed. Talk about road hogs—these infernal trucks are more than hogs—they're insolent, roaring, swash-buckling bullies. They're so big they'll nose you with any ordinary conveyance, but they never bother me when I ride on the train.

I don't like those drivers that are always in a road race. I don't like it all right at Indianapolis or Daytona Beach, but it's no good on the highways. Of course, even so often one of these speed boys races a train to a crossing, but I always feel sorry for the poor saps that were riding with him. They'd be much better off riding on the train.

I like to read as I travel.

I like to sleep at night stretched out horizontally.

I like to take my clothes off when I go to bed.

I have slept on the ground many a time—but when I'm travelling to arrive somewhere on a business trip or the start of a vacation—I like to get sleep that leaves me rested.

I like to wash my face and hands at the end of the day. I like the notion, but I like to dry them on a clean towel. On a private towel.

That's why I take the train.

I like a drink of water when I'm thirsty. I may not care about it when somebody else is thirsty, or when we come to a drinking place on regular schedule, but when I, myself, am thirsty. And I can have it on the train.

I like to eat when I myself am hungry. They let me do that on the train. I have never been able to schedule a business trip according to weather.

Very often I am obliged to travel when it is bitter cold, or in the midst of heavy rain, snow or fog. The train takes me through on schedule—rain or shine, hot or cold, day or night—summer or winter, low ceiling or high. It's the dependable factor in travel.

Worst of all, I hate watchful waiting for the last twenty miles before the next rest stop. I know that every one else is watching, waiting too. The air becomes tense. The situation grows nerve-racking. Friendship ceases. For when a lot of people want to go out at the same time, and there's only one door to go out through, and only one door to go in through, and only one or two who know when you get to the place—then, I say, friendship ceases and strife begins. Every man for himself, and devil (or cramps) take the hindmost.

No sir, I much prefer to go when I have to go. That's another reason why I take the train.

Good Likeness Of Caesar

After careful study the German Archaeological Institute has pronounced the Roman bust found near Catania, Italy, a likeness of Julius Caesar. It had been resting on a shelf in the library of the University of Catania for more than 200 years. No one knew what it represented until now the German savants declare it to be the most life-like of all the images of Caesar that exist.

Marvels Of Science

Wizardry Of The Electric Eye Is Difficult For The Lay Mind To Grasp

The electric eye will get you if you don't watch out. At least that seems to be the moral from the latest magic of applied science. It has been put to use already in offices, factories, restaurants, homes and theatres.

It has been set into pavements where it registers your speed; and it is just too bad for you if you have been stopping on the gas. But it also turns on the parking lights when parking lights are indicated and it may when the sun sets switch on the street lights, and next morning turn them out again. It works automatically in schools and factories, turning on and off the lights as necessity demands.

It is quite a busy entity around publishing offices where the 170 manual processes required to make a half-tone cut (photograph for printing) may be covered by the eye in a few moments. It can match color of papers and inks, cover the thickness of paper being produced and detects breaks in the rolls of paper going into the printing presses and instantly stop the machines.

Electric eyes turn on and off the lights giving the course to ships and they do the same thing for flying fleets. The shadow of a girl on the door and it will open—if the electric eye is on its job—admitting the waitress and her tray.

How does it work? Scientists O. H. Caldwell, writing in the New York Times, says that it is through the selenium light sensitive cell. You illuminate a prepared bit of selenium and its resistance undergoes a sharp change; the electrical current that is flowing in the circuit suddenly increases and can be used to operate relays, which in turn work switches producing the desired result. The electric eyes isn't very yet, in fact it has just begun. Its destiny if it gets busy is to make electricity direct from sunlight. Upon every foot of the earth's surface the sun delivers 175 watts. An ordinary roof 30 ft. x 60 ft. is big enough to produce enough electricity to run a small house. It is estimated that enough sunlight falls on the deck of the Atlantic liners to drive them at full speed.—Winnipeg Free Press.

Wool Producing Countries

Canada Is One Of Four Within Empire

Canada, with the exception of the United Kingdom, is the only important wool producing country in the net import of wool. The Empire as a unit says the Empire Marketing Board, has a heavy surplus of raw wool, and is a net exporter of the same. In recent years net exports of wool from the Empire have been greater than net imports. In other words, the whole of the Australian wool clip may be reckoned as surplus to Empire requirements, the output of the Empire being in excess of sufficient for the Empire wool textile and carpet industries.

The extent of the Empire's net exports of raw wool has increased in recent years, owing to an expansion in exports from production countries rather than to any decline in United Kingdom, net imports. Of the eight leading wool producing countries of the world, four—United Kingdom, Australia, New Zealand and South Africa—account for roughly one-quarter of the estimated total wool clip of the Empire.

Of the total is about 47 per cent. Among foreign countries, the United States and Argentina produce the nearly equal quantities though the case of Russia the wool is of an inferior quality. South Africa produces about 10 per cent. of the total. New Zealand, which is double the output of the United Kingdom. Canada's average of production from 1926 to 1930 was 9,000 tons.

Serum Treatment

London Investigator Claims He Has Found Specific For Flu

Pneumonia

Two cures of influenza pneumonia by serum similar to that for immunizing ferrets against "flu" were claimed by Dr. Ronald Hare, a London investigator.

In telling how he treated two women, one of whom was dying, Dr. Hare said "both cases reacted in a very dramatic fashion" and recovered.

The serum was prepared from human convalescing from influenza.

Dr. Hare reported in The Lancet, British medical journal, that his first case, a woman of 27, was in a grave condition.

After two injections of serum four hours apart, he said, she began to improve. A third injection was made the following day. Thereafter her recovery was steady. In the second case, Dr. Hare said, there was an uninterrupted recovery.

Labels Must Be True

According to the newly enacted regulations of the Meat and Canned Foods Act when a variety of corn is named on the label, the corn must be true to that variety, i.e., Golden Bantam corn must be packed from Golden Bantam variety, not from any other variety of yellow corn, and so on.

World Conference Results

Says Conference Was Far From Being a Failure

Far from being a failure the World Economic Conference accomplished as much as any thinking person expected of it, said John W. Ross, president of the Canadian Chamber of Commerce, on his return from London. Mr. Ross led the group of Canadian business men who attended the 13th congress of the Federation of Chambers of Commerce of the British Empire.

World conditions could not be changed in a day, Mr. Ross said. The conference had set up machinery which would continue to do important work in guiding the necessary changes which had to be evolutionary rather than revolutionary.

Europe, while experiencing international difficulties at the moment, Mr. Ross said, was making a definite effort towards rehabilitation. A slow recovery from the depression was noticeable and the tendency of the United Kingdom to align itself with the United States at the World Conference had a profound effect. It still remained to be seen what the ultimate reaction of Europe to the British and United States stand would be.

Ten Thousand-Mile Voyage

Miner's Leave England For Vancouver In Small Ship

Seven adventurers have sailed from Falmouth, England, in a tiny thirty-six-ton vessel bound via Panama for Vancouver. With the veteran skipper, John Antle, at the wheel, the mission boat, "John Antle," of the British Columbia coast mission, headed down channel bound for Las Palmas, across the south Atlantic to Trinidad, thence to Panama, San Francisco and Vancouver with the flag of the mission floating proudly at the masthead.

Delays in preparations for the ten thousand-mile voyage necessitated abandoning plans to make St. Johns, Newfoundland, the first trans-Atlantic port of call owing to risk of encountering storms.

Thousands visited the little vessel while she lay at Lambeth pier and at Greenwich, a score of friends, including the aged Bishop Perrin, formerly of Columbia district, gathered to bid the Argonauts Godspeed. They hope to reach Vancouver about October 6.

Big Coal Contract

The Crown Nest Pass Coal Company, of Fernie, has secured the entire contract of the Winnipeg Electric Company for coke, amounting to 50,000 tons a year. Formerly United States supplied the Winnipeg firm. The Fernie company will supply the coke from its Michel, B.C. workings, the contract bringing added employment in the coal fields.

For the first time on record in England a woman has auctioned pedigree cattle. She was Miss Maud Colman, officiating at Reading cattle market.

Advances in silk prices are causing jubilation among cocoon growers in Japan.

Part of a stamp collection brought nearly \$10,000 at a London sale.

HORSES WORK BETTER

When freed from saddle bolts, collar, blinkers, bit, and blinkers, horses work better, says a study by the U.S. Army.

MINARD'S
"KING OF PAIN"
LINIMENT

W. N. U. 2007

Ignorance Is Appealing

Many Visitors From Across Border Know Nothing About Canada

The report of a Californian arriving at Windsor and asking: "Who is the King of Canada, and where does he live?" is not at all unusual. The colossal ignorance of so many United States visitors to this country can be told in plenty by officials at every border point. He is in the same class as that other American who, on a train running between Brantford and London, was heard to tell a companion that for every acre seen on each side of the track the farmer owned had to directly send to King George one dollar per annum.

The farther South and West the visitors come from the more appalling it all is.

How can a nation realize anything about international affairs or the situation in Europe when it contains so many millions absolutely ignorant of its nearest neighbor and best customer? It is little wonder that these people are meat and drink for the self-seeking politicians on the European debt question.

Activity In North

Business Conditions Reported Good In The Yukon

"Business conditions throughout the Yukon are better than they have been in years," stated J. P. Fort, district engineer for the Dominion department of public work who has returned from his annual trip to northern British Columbia and the Yukon. He reports much activity in the north this season. The tourist steamers are carrying large numbers of people although fewer steamers are operating.

"So many men are forced out of positions by the depression they took to the creeks where they are now washing the bars of gold and in many cases making more than wages," Mr. Fort stated. "The rise in the price of silver," he continued, "is encouraging miners and the anticipated rise in the price of base metals, such as lead and zinc, has caused increased activity to such an extent the White Pass and Yukon Railway is planning an extra boat on the Yukon River to move the ore in the late fall."

Property Marked By Symbols

Indian Chief Has Own Design On Teepees and Blankets

Legends of the Indians are the native lore of Canada, and in their figure painting and strange design stories of the mountains, plains and rivers are told. Symbols mark the teepee of the chief and even his blankets have the chieftain's design which designate them as his alone.

Cleverly worked out are the Indian designs woven into rich blankets made by members of the Handicrafts guild at Edmonton from native wool of Alberta. Both are deep maroon red but the chieftain's blanket has a wide border of blue and three bars of red form his own design.

Pointed peaks of the coast-line mountains are woven in color into the blanket. A black belt on a grey background is the sign of the river. Woven in black and grey are the symbols of arrowheads and the cleft apex of gold moths the winged gene of the north.

The Price Of Wheat

Prospects More Bright Than For Many Years

With the United States determined to control production, no matter what other countries may do, the time seems to be approaching when the world's wheat bin will not be overflowing, and when there will be more demand for it. That time may not be here—and there is no real reason for the skyrocketing of wheat prices—but it appears to be on its way, with prospects for reasonable wheat prices more bright than at any time during the past three years. —Ottawa Journal.

No Such Car

The teacher was trying to illustrate the meaning of the word "perseverance."

"What is it," she asked, "that carries a man along rough roads and smooth, coasts, up and down through jungles and swamps and raging torrents?"

The class was silent. Then Willie, whose father was a motorcar dealer, said: "There ain't any such a car."

Has Data On Birds

Miss A. M. Howdell, Cornell University student of ornithology, knows all about the home life of the tree sparrow in the frozen tundras of Canada's far north. She left Winnipeg en route home with full data and photographs she collected over two months' close observation of the birds at Churchill, newest Canadian port of Hudson Bay.

Another Tradition Ended

Last Hudson Bay Company Ship Has Sailed From England

Recently the ice-breaker "Naoscope" steamed down the Clyde from Ardrossan, marking the end of a tradition that has lasted 245 years.

In 1688 the first "Naoscope" "Hudson" sailed from Gravesend to Hudson Bay with forty-two men, the pioneers of the Hudson Bay Company. It was the dashing Prince Rupert, the first Governor, who backed this first venture of the Governor and Company of Adventurers of England Trading Into Hudson's Bay and ever since then ships have sailed from Britain to Canada with stores and provisions and back from Canada to Britain with cargoes of furs.

But the "Naoscope" is the last of them and will never return to British waters. The departure was the last sailing of a Hudson Bay Company ship from Britain. The "Naoscope" will remain permanently in Canadian waters and fur collections will in future be shipped each year to England by the regular Atlantic liners.

—The Times (London).

Tact Of The Japanese

People Carefully Avoid Saying Anything That Might Displease

It is not an exaggeration to say that it is a social crime in Japan to give in answer to a question any reply (however true) which may displease, or to ask for any favour which will make necessary a blunt refusal. Among certain peoples the messenger of evil was rewarded with death; in Japan, unless he conveys his message with suitable circumlocution, he is likely to be ostracized as a barbarian. Blunt negatives and direct refusals are, in fact, unknown to the code of the Japanese, and in order to convey such notions one must speak circuitously, casting hints of one's meaning here and there. Thus the conversation of two Japanese men is likely to be at times as face value, for each is engaged in suggesting, not deliberately stating his meaning and in trying to discover the implications of a string of conventional phrases and vague suggestions. Japan is no place for those who pride themselves on speaking their mind.

An Ancient Deed

Land In Ontario Granted Over 100 Years Ago By British King

An ancient deed to 200 acres of land in Ontario, granted over 100 years ago by England's reigning monarch of that period, is in possession of Miss Genevieve Lent, of Calgary. The deed is written on parchment as thick as velvet with the royal seal, in beeswax, attached.

The royal seal transferred 200 acres of land in the township of Chatham to Amelia Van Dusen, United Empire Loyalist, spinster. Miss Lent is a descendant of Amelia Van Dusen, one of the first women to hold land in her own name in Canada. She is also the only woman on record to have received a direct grant from the king in those days.

New Species Of Fish

Specimens Of Queer Angler Has Been Brought From Tropics

A fish which goes fishing, dangling before its mouth the tip of a long tentacle as a lure for smaller fry, is among the specimens which have been brought from the tropics by Dr. William Beebe of Philadelphia. Fish which venture within striking distance to investigate the waving wand are gobbled up. Forty previously unknown varieties of fish were discovered and classified in the six-week expedition into Central American waters.

Hero Glider Record

German University Student Remains In Air 36 Hours

Kurt Schmidt, Koenigsberg University student, flying a glider he built himself descended after setting a new world's record of 36 hours and 37 minutes.

He had remained at an altitude of 200 to 300 metres (650 to 1,000 feet) to beat the former record of Lieut. Cooke, who established a mark of 21 hours and 34 minutes in Honolulu. Schmidt, 27 years old, is a Nazi storm trooper whose home is at Albenstein. When he tumbled out of his glider he was carried upon the shoulders of his enthusiastic companions to the Luftsport club. Apart from sore eyes, his only ailment was a goggle, he was in nowise exhausted.

A Dramatic Remedy

Here is a new one, or rather a rejuvenated old one, for bald-headed men to try. An almanac dated 1872 just donated to the museum at Wakefield, Va., George Washington birthplace, contains the following advice: "Take heed, those among ye who may be bald, and rub that part of your head and evening with this till it is red. Then rub with honey."

BABY'S SOAP

best for baby

When Glamor Is Gone

Many Retired Farmers Find City Life Not So Attractive

A fair amount of the glamor of city life has been brushed aside during the past three or four years. Many a farmer who retired from the land with what he thought was enough capital to see him through for the rest of his days, has found that investments he may have made are not as profitable as they were. Many of them—most of them no doubt—will come back, but in the meantime many of these farmers are experiencing a pinch which they never knew on the farm. Those who expected to supplement their income with city jobs have realized that when depression hits a country a factory job is an uncertain commodity, while other expenses have a habit of continuing as usual.

So the old farm looks attractive, and experience has shown that its imaginary discomforts are merely blessings in disguise.

Thunder Storms Never Cease

About 1,800 Raging In Different Parts Of World Every Minute

It is estimated that the approximate number of thunderstorms occurring over the whole earth in the course of a year is 16,000,000. This works out at 44,000 a day, and if we make allowance of an hour for the average duration of such a storm, the simple calculation tells us that at any one minute there are probably 16,000 thunderstorms raging simultaneously over the continents, islands and oceans.

From the known mean rate of electrical discharges it may also be deduced that in every second of time there must be about 100 flashes of lightning passing either from cloud to earth or from cloud to cloud in various corners of the globe.

Thunderstorms reach their greatest frequency in equatorial and tropical regions, where 100 to 150 a year is quite an ordinary number. In fact, the average number of such storms per year is about 100. The Amazon the normal annual number is said to exceed 200, and with such regularity do the storms break out there during the latter half of the year that certain seasons that in issuing thunderstorms are almost a certainty. It is customary to indicate whether guest are expected to arrive before or after the usual date.

Another Serious Pest

Clover Dodder Brought To Canada From Southern Europe

There is probably no weed in the universe so much hated against as clover dodder, which was introduced into Canada from Europe. It is a serious pest in France, Spain, Italy, and other southern European countries; in Chile and other parts of South America, in the United States and in fact in all countries which have long summers without frost. During the years of shortage in clover seed crops in Canada it was frequently introduced and distributed in imported seed and its ravages on red clover have been taken on a few instances in southern Ontario and the Pacific coast in years following an exceptionally late fall. The dodder is an annual parasite with slender yellowish and red stems which twine about the host plant and become attached to the clover stems by suckers through which it obtains nourishment. Alfalfa dodder, says the Dominion Seed Branch, has given trouble in southwestern Ontario and in the prairie provinces where it is known to have continued in alfalfa for three years. Badly infested fields should be ploughed under before seed forms.

One Air Banned

There is no man in the Navy more popular than Admiral Sir John Kelly. The stories told about him are legion. Once, when he was in the drill, in which it is customary always to include at least one unorthodox order, he gave instructions: "Three bandmen from each ship are to be sent to the flagpole, and on arrival to play a popular air. There was added, however, his signature, this note: "For the purpose of this exercise, 'Tia Anybody Here Seen Kelly?' will not be recognized as a popular air."

QUIVERING NERVES

Yield to Lydia E. Pinkham's Vegetable Compound

When you are just on edge... when you can't stand the children's noise... when everything is a burden... when you are irritable and blue... try this medicine. 98 out of 100 women report benefit.

It will give you just the extra energy you need. Life will seem worth living again.

War Enemies Never Met

Foch and Hindenburg Disappointed When Plans Were Spoiled

Hindenburg and his great antagonist Foch never met.

Nor did the field-marshal-president ever have the opportunity of talking over the war with Pétain, Joffre, Lyautey, Fayolle and Franchet d'Esperey, the other French marshals. Yet like a good professional soldier, he would have liked nothing better.

However, he came within an ace of meeting Foch, for whose character and tactical ability he had the highest regard. It took his elevation to the presidency of the Reich to forestall what would have been an historic encounter.

In the autumn of 1924, Foch told his aide, Major René L'Hopital, that he hoped some day to meet Hindenburg, "not as a Frenchman and a German, but as two old soldiers."

L'Hopital, who knows German as thoroughly as he knows English got busy. Through personal friends, in Berlin, he had his chief's desire brought to Hindenburg's ears. The old marshal readily acquiesced.

Then came the problem of how to arrange the meeting. Nationalistic feeling was running high in both France and Germany. Hindenburg's hobnobbing with the hereditary enemy would have caused a storm of protest. Foch's fraternizing with his German counterpart would have made the Third Republic rock.

L'Hopital, always a diplomat, found a way out. Foch was to go down to Strasbourg ostensibly to inspect the view to take place in the early spring garrison. Hindenburg at the same time would be taking the cure in Baden-Baden. Overnight the ex-generalissimo of the Allies would motor over to Strasbourg, unannounced, with L'Hopital to act as interpreter.

The stage was all set for the interview of 1925. Then Hindenburg's fellow countrymen elevated him to the presidency. And while a retired German army officer might very well meet a retired Frenchman either privately, it was actually out of the question for the president of Germany to receive Marshal Foch under any circumstances.

Foch regretted the missed opportunity until his dying day. "I have the highest regard for Hindenburg," he frequently told friends, "I consider him a really great man."

THE RHYMING OPTIMIST

By Alice Michalson

PERSPECTIVE

Let me not ever live too near
The things that cause me fret
And fear.

Let enemies I look upon
May loom so vast they hide the sun.
The glamour of the golden day.

Nor let me hold too near my heart
The love which form life's happiest part
Too much of brilliance blinds the eye.

May I love well, yet still be wise
And go, undazzled by the gleam
Of love, which makes earth's lowliest dream.

Let me not ever live too near
The things most dreaded or most dear;
Too much of shade, too much of light.

In slight, dimmed or dazzled, is the same.
Ah, let me see my bliss or strife
As part, but not the whole of life!

New Hybrid Oats

Experiments At University Of Saskatchewan Produce Drought Resistant Variety

New hybrid of oats under test at the University of Saskatchewan are showing much greater resistance to drought than standard varieties. Dr. J. B. Harrington, in charge of cereal experiments, observes. Several varieties of barley such as Colossal and Regal also show far more ability to withstand dry weather than O.A.C. 21 barley common grown.

Dr. Harrington believes that the experimental results this year while crops are small will provide valuable information on such questions as the smattering of grain varieties.

SPANISH CORN PUDDING

Half cup sweetened condensed milk, 2 1/2 cups corn cut from cob or canned corn, 1 cup chopped green pepper, 2 tablespoons chopped pimiento, 1 teaspoon salt, 1 teaspoon oil, 1 teaspoon salt, 2 eggs.

Blend sweetened condensed milk, corn, chopped green pepper, chopped pimiento, chopped onion, salt and well-beaten eggs. Pour into buttered baking dish and bake 25 minutes in a moderate oven (350 degrees Fahrenheit). Serves six.

Needed Sea Trade

A Polish poet of the 16th century said that a Pole need not go to the sea as it is if he ploughs diligently, but modern Poland has learnt that for one prospering in sea trade, and the per cent. of her foreign trade is now sea-borne.

Little Helps For This Week

"The God of all grace who hath called us unto His eternal glory by Christ Jesus, after that ye have suffered awhile, make you perfect, stable, strengthen and settle you." — Peter 5:10.

How shall thou bear the cross that now
So dreary is a weight appears?
Keep quietly to God, and think
Upon the eternal years.

The world has no room for cowards. We must all be ready somehow to toil, to suffer, and to die. And yours is not the less noble life because no drum beats before you when you go out into your daily battle-field, and no crowd shouts about your coming when you return from the daily victory or defeat.—Robert Louis Stevenson.

We cannot say this or that trouble shall not befall, yet we may by help of the Spirit say nothing that doth befall shall make me do that which is unworthy of a Christian.—R. Sibbes.

Last Of Her Line

Pictureque Sailing Schooner Of Great Lakes To Be Burned

One of the ancient sailing schooners, a thousand of which at one time transported the commerce of the Great Lakes, before the age of steam, is to be burned as a public spectacle at Toronto. The vessel is the "Lynx" M. Davis, built sixty years ago, 128 feet long, of 450 tons register, with a mast 130 feet high above the deck and carrying intricate rigging aloft such as was characteristic of the sailing ships of the early days, demanding the services of unusually capable sailors.

It is a tribute to the material and workmanship put into ships constructed sixty years ago that they are seaworthy and would be quite efficient as carriers today if they had not been rendered obsolete by the advance of the machine age which has been just as dominant in the sphere of shipping as in other industries where human hands have been displaced by iron and steam.

The sailing craft is gone from the Lakes so far as commerce is concerned and with it much of the romance associated with ships and sailors. A few men and boys get recreation from sailing pleasure boats in amateur races and the sailing ship of the early days, demanding the services of unusually capable sailors.

A Toy Lending Centre

A "toyry" or lending centre for toys has been opened at the New York University Community Centre, at which toys will be lent to children for one week or two weeks, as books are lent at the public library. Children applying for toys must be accompanied by their parents. An appeal for toys whose owners had grown or discarded them was made by the organization.

Royalty Learns To Box

Since it has been known that the Prince of Wales and his two nephews, Lord Lascelles, and the Hon. Gerald Lascelles, have learned to box both boys and girls of prominent London families are learning the art of pugilism at the request of their parents. The princess royal attended a boxing exhibition in which Lady Mary Cambridge, the queen's great-niece, took part.

Local News

Mrs. Albert Knowles was removed to hospital on Saturday for an emergency operation.

Mr. and Mrs. Chas. W. McKinnon and daughter Grace are spending two weeks holidays at Waterton Lakes.

Mr. and Mrs. T. Badham and Miss Margaret returned to Drumheller Tuesday, after spending a few weeks here.

Mr. and Mrs. J. Ford and son William returned on Sunday from two weeks holidays, journeying as far as Vancouver and Victoria.

A new bath house at McGillivray tipple is a much appreciated convenience by the tipple and shop men.

Blairmore baseball team won by 9-7 in a game against Coleman on Tuesday at Blairmore. Blairmore retains the challenge cup. Joe Kapka pitched for Coleman; Honbriggs for Blairmore, and was replaced in the last inning by Taber. Olson of Blairmore umpired, Jim Fraser, Coleman, base umpire.

Local News

Mr. and Mrs. O. E. S. Whiteside and Adele returned from a pleasant holiday at Hayden Lake resort, near Coeur d'Alene, Idaho. A splendid 18-hole golf course provides an opportunity for recreation, and being only 40 miles from Spokane, it is quite a favored resort by people from the city. Originally built by the Great Northern railway, and later purchased by Coeur d'Alene business men, it furnishes a splendid holiday asset to the district.

"Only a rose," but many people stopped to give more than a passing glance at a beautiful bloom on a bush in the attractive garden of Mr. and Mrs. A. M. Morrison. Increased interest has been noticeable throughout local gardens this year, and the slogan—"It's not a home till it's planted" has borne fruit. A "better gardens competition" with suitable prizes would stimulate greater interest and help beautify the town.

Last week a man alleged to be under the influence of intoxicants was collecting money for a poor family for whom the town had provided in their distress, and used insolent and abusive language in the process. Perhaps nothing should be said of such an abused creature, but how can public sympathy and help be developed when such degraded specimens bite the hand that feeds them?

The majority of people have charity in their hearts, and are willing to do their share in carrying the other fellow's burden, but they would indeed be worms if they subjected themselves to indignities which ignorance appears to engender.

Col. Hugh Clark, whose humorous yet trite quotations attract wide attention, hits it right when he states: "The world is so heavily in debt that those who think it owes them a living are just out of luck." It is time that half-baked individuals who are always crying that everybody should help them but themselves, realized the fact

TOWN OF COLEMAN

The following property is offered for private sale; Lot 8, Block 22, in Plan 820L, and store building, formerly occupied by E. Oacelotone. Particulars given at town hall.—James Ford, town secretary. 21st

There is not a business but which can be helped by the use of advertising and printed matter. The man who is alive to opportunities and the advantages of rightly placed publicity does not have to be told—he already knows.

Buy typewriter ribbons and copying paper at The Journal office. Blank counter check books or printed to your order, may also be obtained.

Let Us Save You Money

EVERY car on the road requires a certain amount of attention. But few of them get it until the cost of that attention exceeds by far the sum of the small costs that the proper attention from time to time would have cost to prevent major difficulties. Drop in from time to time and let our experts make an inspection and give you an estimate if any work needs to be done. It will save you money.
